Continuation patterns are price patterns that show a temporary interruption (pause) of an existing trend.

In the other hand, reversal patterns are opposite to continuation patterns. They usually reverse the current price trend, causing a fresh move in the opposite direction.

Neutral patterns signal a price move, but the direction is unknown. In the process of the pattern confirmation, traders realize the pattern's potential and decide the direction with the respective trade.

Special trading patterns appears on both market trends, and have predetermined outcome direction.
