regard to it and most crucially a rejection of Chomsky's eliminativism about the role of intentionality not only in his own theories but in any serious science at all. This last is a fundamentally important issue for linguistics, psychology and philosophy that an examination of a theory as rich and promising as a Chomskyan linguistics should help illuminate. The book ends with a discussion of some further issues that Chomsky misleadingly associates with his theory: an anti-realism about ordinary thought and talk and a dismissal of the mind-body problem's towards the solution of some of which his theory in fact makes an important contribution.

*The American Intellectual Tradition: 1865 to the present* David A. Hollinger, Charles Capper, 2006. Revised and updated the fifth edition of this now standard two-volume anthology brings together some of the most historically significant writings in American intellectual history. Uniquely comprehensive, *The American Intellectual Tradition* includes classic works in philosophy, religion, social theory, political thought, economics, psychology and cultural and literary criticism. Organized chronologically into thematic sections, the two volumes trace the evolution of intellectual writing and thinking from its origins in Puritan beliefs to the most recent essays on diversity and postmodernity. Pedagogical features include introductions and headnotes to the selections, updated bibliographic material throughout and detailed chronologies at the end of each book. Addressing such highly contested subjects as race, class, gender, aesthetics, political religion and the role of the United States in the world, *The American Intellectual Tradition* Fifth Edition is invaluable for undergraduate courses in intellectual history. It is also an excellent supplement for graduate seminars and classes in American history, American studies and American literature. Volumes I and II now offer new selections from Roger Williams, John Humphrey Noyes, Asa Gray, Thomas Wentworth Higginson, Charles Augustus Briggs, Elizabeth Cady Stanton, Walter Lippmann, Thurman Arnold, Henry Luce, Henry A. Wallace, Albert Einstein, Aldo Leopold, James Baldwin, George Kennan, Milton Friedman, Herbert Marcuse, Edward Said, Gloria Anzaldúa, Henry Louis Gates Jr, Joan W. Scott, Samuel Huntington and Carl Sagan. Publisher's description.

Howard Kainz looks for the best available answers to these and other questions, drawing upon classical and recent philosophy as well as the current state of scientific knowledge.
