Getting started with

CodeIgniter 4, master the basics of the PHP framework for beginners Andrés Cruz, This book is for anyone who wants to build their first applications in CodeIgniter 4 this writing offers a step by step introduction to the framework knowing the most relevant aspects of it and is focused above all on practice It is assumed that the reader has knowledge and has developed in PHP and related technologies of the language such as JavaScript HTML and CSS since remember that to use any framework you have to have the bases that support it that is your programming language The book is aimed at those people who want to learn something new learn about a framework that has very little documentation who want to improve a skill in web development who want to grow as a developer and who want to continue scaling their path with other frameworks superior to this one As long as you meet at least some of the above considerations this book is for you Map This book has a total of 21 chapters and consists of explanations and practices Chapters Chapter 1 This chapter is intended to explain the environment needed to develop in CodeIgniter 4 Chapter 2 We take the first steps with the frameworks we will know the official website of the framework installation forms and advantages of each one of them we install the framework we will know the initial aspects on how to run the framework configure a database create our first components the use of

migrations for table management and we will see several cases on how to work with them we will work with the MVC and create each of these components that define it from scratch routing and of course finishing the chapter with the traditional CRUD for one of our entities Chapter 3 It is a practice for you in which you have to create another CRUD putting into practice everything seen in the first chapter Chapter 4 You will know how to use the routes grouped routes their options and the different types Chapter 5 We will know the use of the session and also of the flash session to save data and present it to the user Chapter 6 You will learn to manage views in a reusable way Chapter 7 We will see how to use a more modular scheme when defining controllers for each type of module Chapter 8 We will know how to work with HTML forms and apply validations from the server side in CodeIgniter knowing the types of validations creating them and applying validations from the controller to then finally show the errors by the view we will also learn how to use helper functions in our forms Chapter 9 We will learn more about models some properties that we can define in them the use of functions and common example cases Chapter 10 We will learn to use filters to intercept requests as a practical case we will create an authentication module with login for our application in which we will protect the management module or dashboard Chapter 11 In this chapter we build a Rest Api type CRUD that can be consumed with JSON or XML being CRUD type operations and working mainly from the server side it will be a process similar to the CRUD that we created in Chapter 2 but with some variations that are typical of this type of structure Chapter 12 In this chapter you will learn to generate test data with seeders which are ideal for when we are starting to develop Chapter 13 In this chapter we will learn how to handle the relational schema of the database in CodeIgniter we will look at one to many and many to many relationships Chapter 14 In this chapter we are going to work with uploading files in our application to upload images to our movie model Chapter 15 This chapter provides an introduction to the use of the libraries and help functions and how to use them Chapter 16 In this chapter we will learn how to integrate the PayPal platform in CodeIgniter in order to process payments directly from the application Chapter 16 This chapter we will adapt Bootstrap 5 components in the application Chapter 17 This chapter we will create an end user module with list and detail page Chapter 18 This chapter we will make some changes in the Rest Api created previously to define additional methods such as upload pagination among others Chapter 19 App with Vue coming soon Chapter 20 In this chapter we will learn how to integrate the PayPal platform in CodeIgniter in order to process payments directly from the application Chapter 21 This chapter we will know how to integrate CodeIgniter shield to handle authentication and authorization also we will create a small project with which we will learn to manage groups and permissions By the end of the book you will have the knowledge to create any basic application with the framework and know more than just the basics of it I invite you to visit my website desarrollolibre.net And get to know my work
