Chapter Capital Structure And Leverage:

Capital Structure and Corporate Financing Decisions H. Kent Baker, Gerald S. Martin, 2011-05-03 A comprehensive guide to making better capital structure and corporate financing decisions in today's dynamic business environment. Given the dramatic changes that have recently occurred in the economy, the topic of capital structure and corporate financing decisions is critically important. The fact is that firms need to constantly revisit their portfolio of debt, equity, and hybrid securities to finance assets, operations, and future growth. *Capital Structure and Corporate Financing Decisions* provides an in-depth examination of critical capital structure topics, including discussions of basic capital structure components, key theories, and practices, and practical application in an increasingly complex corporate world. Throughout the book, it emphasizes how a sound capital structure simultaneously minimizes the firm's cost of capital and maximizes the value to shareholders. It offers a strategic focus that allows you to understand how financing decisions relate to a firm's overall corporate policy. Consists of contributed chapters from both academics and experienced professionals, offering a variety of perspectives and a rich interplay of ideas. Contains information from survey research describing actual financial practices of firms. This valuable resource takes a practical approach to capital structure by discussing why various theories make sense and how firms use them to solve problems and create wealth. In the wake of the recent financial crisis, the insights found here are essential to excelling in today's volatile business environment. [Capital Structure, Earnings Management, and Risk of Financial Distress](#)

Pietro Gottardo, Anna Maria Moisello, 2018-09-24 This book analyzes the impacts that family control of firms has on capital structure choices, leverage, and the risk of financial distress; earnings management practices; and the relation between accounting choices and firm market value. For these purposes, longitudinal data on Italian family and non-family non-financial firms are closely analyzed. The Italian setting is of special interest in this context because family businesses account for 94% of GDP; families are particularly committed to maintaining control of firms; and the economy is bank-based rather than market-based. The analyses draw on the socioemotional wealth approach, which emphasizes the importance of the stock of emotional value in family firms, in combination with financial theories such as Pecking Order Theory, Trade-off Theory, and Agency Theory. The findings cast significant new light on differences between family and non-family firms and the effects of different forms of family influence. The book will have broad appeal for academics, managers, practitioners, and policymakers. [Capital Structure Dynamics in Indian MSMEs](#)

Nufazil Altaf, Farooq Ahmad Shah, 2020-12-10 This book examines the capital structure dynamics in Indian MSMEs, offering empirical evidence to better understand the financial practices within entrepreneurial settings. Altaf and Shah, in this book, assess the financing pattern of Indian MSMEs, response of capital structure determinants to different macroeconomic states, links between working capital and capital structure, cash flow volatility, and capital structure, and also the impact of credit risk on capital structure and firm performance relationship. This book enthuses the audience looking to understand newer dynamics of capital structure and its interplay in the Indian MSMEs. [The Capital](#)

Structure Decision Harold Bierman Jr.,2012-12-06 In 1958 an academic paper on corporate finance written by two professors Merton Miller and Frances Modigliani who were later awarded the Nobel prize for their research efforts was published in The American Economic Review One prime conclusion of their paper was that the exact form of a firm s capital structure did not affect the firm s value Later papers by the same two authors and by many others modified the assumptions and changed this conclusion We now think that capital structure decisions do affect a firm s value and corporate managers should understand better the financing alternatives that are available One of the most important financial decisions is the decision to buy or lease assets The leasing industry is large and getting larger Unfortunately it is very easy for a firm to evaluate incorrectly lease alternatives see Chapter 12 The capital structure decision is one of the three most important financial decisions that management make the distribution of earnings and the capital budgeting decisions are the other two contenders Managers should increase their understanding of capital structure alternatives and remember that choosing the best capital structure is an art and not an exact simple calculation But applying the art can be improved with understanding
