CONCEPTUAL FRAMEWORK FOR CORPORATE RESTRUCTURING, MERGERS AND ACQUISITIONS

2.1 Introduction to Corporate Restructuring:

A change in the existing environment of business, calls for a change in the way in which companies within that business environment operate. If the change in environment is drastic, then the change in companies would also have to be as dramatic, sometimes even more so. When this dramatic change is to do with changing the entire structure of the company, it is known as Corporate Restructuring. Any type of restructuring is aimed at either growth or achieving sustainability.

An entrepreneur may grow his business either by internal expansion or by external expansion. In the case of internal expansion, a firm grows gradually over time in the normal course of the business, through acquisition of new assets, replacement of the technologically obsolete equipments and the establishment of new lines of products. But in external expansion, a firm acquires a running business and grows overnight through corporate combinations. These combinations are in the form of mergers, acquisitions, amalgamations and takeovers and have now become important features of corporate restructuring. They have been playing an important role in the external growth of a number of leading companies the world over. They have become popular because of the enhanced competition, breaking of trade barriers, free flow of capital across countries and globalisation of businesses. In the wake of economic reforms, Indian industries have also started restructuring their operations around their core business activities through acquisition and takeovers because of their increasing exposure to competition both domestically and internationally.

Mergers and acquisitions are strategic decisions taken for maximisation of a company's growth by enhancing its production and marketing operations. They are being used in a wide array of fields such as information technology, telecommunications, and business process outsourcing as well as in traditional businesses in order to gain strength, expand the customer base, cut competition or enter into a new market or product segment.
