1. The Number Line

Integers

All **whole numbers** both positive and negative

Opposites

Two numbers that share the **same absolute value** but are on the **opposite sides of zero**.

Ex. -5, 5

Absolute Value

A numbers distance from 0

*Because it is measuring distance, **absolute value is always positive!!!**

Inequality

A mathematical term for **comparing** two quantities using $<$, $>$, or $=$

Students should be able to....

- write integers for real world situations
- graph integers and their opposites
- show a numbers absolute value
- write or solve inequalities using integers
- recognize a numbers position on the number line in relation to other numbers (Must know left and right directions!!!!)
- be able to order both positive and negative numbers from least to greatest

**If a number is to the left of a number on the number line, it is less than the other number. If it is to the right then it is greater than that number.
