Straub, 2010-07-27 Longtime Myers collaborator Richard Straub provides an updated study guide for the Our Two-Track Minds Robert A. Paul, 2020-12-10 While many of Freud's original formulations have required either revision or rejection and replacement with newer models his cultural books such as Civilization and Its Discontents and Totem and Taboo though extremely influential in the early part of the 20th century have more recently been either neglected or else dismissed as long outdated fantasies Robert A Paul shows that Freud's ideas in these books and his thinking on how human society is possible given the unpromising materials out of which it is constructed i e human beings can appear in a different and more favorable light when viewed through the lens of contemporary anthropology cultural studies and evolutionary theory Psychological Science and Christian Faith Malcolm A. Jeeves, Thomas E. Ludwig, 2018-04-20 Is it possible to integrate scientific psychology with a Christian understanding of human nature Are science and religion locked in an inevitable conflict or is there an underlying harmony between these two sources of knowledge about humans This book goes to the heart of the past and present dialogue between Christianity and psychology comparing three models that have been used to describe the relationship between them Because Christianity and psychology deal with different levels of truth and speak vastly different languages efforts to unify them often create more problems than they solve What is needed is a better way to think about the relationship an approach that does justice to the emerging insights from psychological science and biblical scholarship and that can enrich our understanding of both In this volume two accomplished psychologists show how this complementary dialogue can unfold giving us a broader deeper understanding of ourselves our relationships and our place in the cosmos Psychology (High School Edition) David G.
