This reliance is only predicted to continue with the growth of the Internet of Things (IoT) in the next few years. Without routers, switches, network cabling, and protocols such as BGP, there would be no internet. This course will teach you how networks actually work and how you are able to connect to websites such as Facebook, Google, and YouTube. Companies throughout the world, from the smallest to the largest, rely on networks designed, installed, and maintained by networking engineers. Join this in-demand industry. By the end of this course, you will be able to confidently discuss networking topics and will be able to start configuring real networking devices such as routers and switches. This is an introductory course, but it contains a lot of information that can be directly applied to the CCNA certification. [Resource description page](#) *Routing Protocols Course*
