variety of vistas from historical analyses to a clear grasp of key concepts Illustrated in detail is the understanding accumulated in recent decades on starting points for co management conditions and methods for successful negotiations ideas to manage conflicts and types of agreements and co management institutions emerging from the negotiation tables Simple tools such as checklists distilled from different situations and contexts are offered throughout Examples and insights from experience highlight the importance of participatory democracy the enabling contexts where sharing power is ultimately possible and successful Published with IIED and IUCN Co-management of Natural Resources Neil Powell,1997

*Collaborative Criteria for Successful Co-management of Natural Resources* Patricia Larkin Ristow,2005 **Towards Negotiated Co-management of Natural Resources in Africa** L. B. Venema,1999 Within the field of management of natural resources this book focuses on the various approaches of policy formulation and implementation The question central to this book is how to co operate with people the various categories of residents as well as non residents in the rural areas in a top down a participatory or a contractual co management way On the basis of a comparative analysis of 12 case studies in the book these three approaches are thoroughly discussed and their internal and external constraints examined The book starts with an editorial chapter discussing the recent administrative and political developments in Africa as well as the new opportunities which they offer for policies in the field of environment and development The question is brought up whether the recent processes of decentralization democratization and empowerment of local organizations have indeed created new opportunities or that they have only superficially changed the political culture of the countries concerned In the concluding chapter of the book the approaches are contrasted to each other as logical models each with its own potentiality and limitations Conclusions are formulated why the top down approach must result in improvization to escape from failure and why the participatory approach risks to end up into a mixed balance Special attention is given to the conditions and the prospects for the contractual or co management approach which has been introduced into Africa only recently Under certain conditions this approach seems rather promising *Co-management of Natural Resources - Implications for Government* K. Kuperan,1999 **Management Guidelines for IUCN Category V Protected Areas** Adrian Phillips,2002 Protected Landscapes IUCN Protected Area Category V are lived in working landscapes In the past there has been a tendency to see them as a rather Eurocentric approach to protected areas but increasingly the category is being designated in other parts of the world including in a number of developing countries The Guidelines include sections on the background and on the planning of such areas and chapters on the principles policies process and the means for their management The text includes more than twenty case studies from ore than fifteen countries in every region of the world *Community Studies in Resource Management* ,2001 Natural Resource Based Enterprises in Malawi Janet Lowore,2001 *Partnerships for a Common Purpose* Alesia N. Read,Troy W. Hartley,2006 **Community Management of Natural Resources in Africa** Dilys Roe,Fred Nelson,Chris Sandbrook,2009 Provides a pan African synthesis of community based natural resource

management CBNRM drawing on multiple authors and a wide range of documented experiences from Southern Eastern Western and Central Africa This title discusses the degree to which CBNRM has met poverty alleviation economic development and nature conservation objectives Economie Internationale ,2009 **Annual Report** Manitoba. Manitoba Natural Resources,1999 *Contested Forms of Governance in Marine Protected Areas* Natalie Bown,Tim Gray,Selina M. Stead,2013 In this book the authors examine the governance of marine protected areas MPA and in particular they compare two different forms of governance co management CM and adaptive co management ACM CM is characterized by the decentralization of the decision making process incorporating the governed as well as the government ACM is characterized by the dynamic process whereby co management decision making is made continuously responsive to the changing ecological and socio economic circumstances of the MPA The authors carry out a comprehensive critical analysis of CM and ACM before applying these concepts to the case study of the Cayos Cochinos Marine Protected Area off Honduras to assess two successive management cycles 2004 9 and 2008 13 The area was designated as an MPA in 1993 a governmental decision which was met with resentment by local communities CM was introduced in 2004 to involve these local stakeholders in the decision making process but achieved limited success In an attempt to deal with these deficiencies ACM was adopted in the second management plan in 2008 but whereas the position of the local communities improved it tipped the scales too far away from conservation A third management plan is currently being prepared that promises to strike a better balance between ecological and socio economic objectives A central theme of the book is to examine how far the CCMPA adhered to the principles of CM and ACM respectively in its first two management plans **The Role of the Private Sector in Community-based Management of Natural Resources in Malawi** Andrew Watson,2003
