**Digital Entrepreneurship** Wadid Lamine,Sarah Jack,Alain Fayolle,David B. Audretsch,2024-06-04 Far reaching technological developments are making a deep impact on societies and economic environments worldwide With the emergence of new digital infrastructures such as artificial intelligence fintech data analytics robotics and nanotech new creative industries still in a state of flux have arisen while others have disappeared at least in their traditional form The intermixing of traditional and new technologies has led to a redrawing of boundaries and an extension of the limits of entrepreneurship out towards industries with hitherto high barriers to entry due to regulatory technological or structural factors These external enablers have led to a democratization of entrepreneurship and a lessening of the obstacles to starting up a company by reducing or eliminating the difficulties inherent in the entrepreneurial phenomenon in its classical configuration such as high resource intensity uncertainty limited time or information asymmetry The De Gruyter Handbook of Digital Entrepreneurship examines the impact of these technological disruptions not only using the existing paradigms but also by re examining our very conception of the entrepreneurial phenomenon in terms of its evolving nature and shifting contours The contributions to this handbook promote the emergence of new theories and conceptions of the entrepreneurial opportunity and process that more fully reflect the realities of the new environment we are living in They will benefit both academics aiming to familiarize themselves with the state of research and theory within topics and subtopics in digital

entrepreneurship as well as practicing entrepreneurs and managers aiming to acquaint themselves with leading edge practices and insights in digital entrepreneurship The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies
