Russian Nazi Troll Bots! Eric W. Saeger, 2018-08-24 It's beyond dispute that trolls and automated bots helped Donald Trump win the White House in 2016 Some of the troll operations involved were based in Russia but domestic interests also participated in the invasion In fact trolls of all types from all corners of the internet came together in a perfect storm of

Innovation Sucks! Alan Watkins, Simon May, 2021-03-14 Businesses spend billions on innovation with very little to show for their investment or effort This book challenges some of the ingrained truths of innovation and suggests a different approach Innovation is not the creation of a novel idea It is the successful commercialisation of that novel idea Rather than starting with a costly time consuming problem assessment that seeks to push potential solutions through an innovation funnel an impeller approach starts with possible solutions and gets the market to pull the best ones forward so they can fail fast or flourish fast This approach is made possible by the addition of a bee a new type of integrative thinker who can harvest the existing knowledge from the meadow of experts Completely reversing the innovation process means organisations are much better placed to win in the market rather than focusing on finding theoretical solutions or clearing innovation stage gates In addition this approach also recognises that the people who shepherd the solution through the ideation and testing stage are not the same people who must then take that solution to market for successful commercialisation Given the current innovation failure rate coupled with the fact that society is beset with multiple wicked problems it s time to think differently and innovate innovation itself This book is essential reading for Heads of Innovation and Commercialisation Directors of Marketing Heads of New Product Development and New Service Development Strategy Directors Chief Technology Officers Government advisers and policy makers
