Innovations in Teaching and Learning for Health

Professions Educators Roger Edwards, Bobbie Ann Adair White, Ardi Findyartini, 2025-06-02 The health professions continue to evolve and change rapidly as more opportunities and challenges emerge. Hence health professions educators are required to be adaptive and nimble in their creation and adoption of teaching and learning innovations. These innovations have included teaching with technologies like virtual reality, gamification, online applications, and artificial intelligence. Innovations also include know-how such as emotional intelligence and ways of approaching the learning process through student-centered learning experiences grounded in the cognitive science of learning. Scholarship related to identification of the best uses of different innovations is difficult. The same innovations have proven to be engaging in some contexts and burdensome in others. Additionally, simulation-based education continues to incorporate innovations in how health professions educators are taught, with more focus on effectiveness of the simulation educator, including applications with distance simulation. Training and development for health professions and simulation educators is becoming more formalized, yet gaps on effectiveness of training and development efforts persist. Faculty effectiveness, especially as it relates to educational innovation adoption, is difficult to measure and demonstration of related competencies is in its infancy. The goal of this Research Topic is to bring together state-of-the-art examples of scholarship in health professions education related to the awareness and appropriate adoption of innovation, which is broadly defined as an idea, practice, technology, and know-how. Evidence about the current state of emerging innovations, effectiveness of innovations, and evidence about the competencies needed for teaching in our evolving environments are all areas of interest for this collection. All types of scholarship can support this focus, including analyses based on primary quantitative and qualitative data collection, secondary data analyses, literature reviews, and methodological infrastructure tool development. Additionally, scholarship investigating how these innovations have influenced health professions educators, including their training and development, is part of the goal of the collection. The scope of this collection covers any innovations that are applicable to professional development and implementation for health professions educators. More specifically, we invite scholarship related to how educators prepare themselves for meeting the needs of their students, given the changing roles and innovations available to both faculty and students across learning environments worldwide. Examples of topics of interest include: Analyses of innovation related to the evolving roles of health professions educators; Reviews of educational innovation adoption by health professions education faculty, especially related to artificial intelligence-linked applications; Exploring factors associated with professional development training and effective educational innovation adoption by faculty; Simulation-based educational innovation applications for faculty development; Faculty innovation in resource-constrained environments in low and middle-income countries; Methodological challenges associated with studying educational innovations by faculty in health professions education; and critical research needs associated with generating and evaluating educational innovations. Methodological

considerations associated with health professions education faculty competencies Theoretically focused analyses are welcome as long as they are linked to applications

Russel Grant, 2023-11-24 **Love by the Prompt: A Romance Writer's Guide to AI-Powered Writing** Rachelle Ayala, Romance writers take your romance writing to the next level with Artificial Intelligence and this guide from a USA Today Bestselling romance author of over 80 romance novels Hi I'm author Rachelle Ayala a prolific author and writing coach with

my Romance In A Month method and I'm here to lead you through the wonderful world of AI Artificial Intelligence. I'll show you the importance of prompting and how to use detailed and guided prompts to leverage ChatGPT, OpenAI Playground, and Sudowrite to give you powerful results. I'll explain the upsides and drawbacks of AI programs and provide advice on how to maximize their capabilities. Need assistance brainstorming? With a few simple one-line prompts, I show you how to literally generate an unlimited number of unusual couple pairings with unique premises in any trope or sub-genre you want. Then I'll guide you through the steps necessary to add conflict and setting layer in extra information and even incorporate a subplot for intensified romantic tension. After settling on a concept or storyline, I'll explain how to develop a comprehensive outline. Then I'll give instructions on turning this outline into chapters and making ChatGPT, OpenAI Playground, or Sudowrite write the actual scenes in a brief period of time. Discovery writers or pantsers won't miss out either. I'll share methods to receive AI-generated suggestions, imagine new directions, or take an existing scene and reshape it with fresh ideas, imaginative twists, and creative expansions. You'll be amazed how I take a single paragraph of an opening scene and iteratively operate on it to transform the AI-created first draft into a coherent and engaging chapter. I also managed to get ChatGPT to write out a complete 14,000-word novelette from an outline of 21 chapters. It stayed consistent and logical and followed the story arc. From there, a writer could either manually fill in the gaps and enhance the story or feed it into Sudowrite for expansion, revision, tone shifts, adding detail, or enhancing emotions. INCLUDES REAL EXAMPLES. I've retained all the original output from ChatGPT, OpenAI Playground, and Sudowrite while holding your hand through prompt after prompt, explaining why I modified a prompt or reacting to the responses I got. I show you how to ask the AI tools to layer in more details, conflict, and twists, and even to ask ChatGPT how best to prompt it for the desired response. CATALOG OF TESTED PROMPTS. A long list of prompts is included to help you get on the ground and running. From there, you can tweak and change my prompts to suit your own story ideas, tropes, and genres. Everything is geared toward writing romance, including character development, plot points, and creating contrasting and compatible heroes and heroines.
