Generative AI and Education B. Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning learning agility and future skills that make the case for the integration of competency based assessment into mainstream education Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector

Leveraging AI for Human-Centered Learning Marlee S. Bunch, Brittany R. Collins, 2025-07-22 Leveraging AI for Human Centered Learning provides intentional approaches to the integration of

artificial intelligence tools into middle and high school classrooms specifically to foster equity and social emotional wellbeing The overlap of AI with today s schools poses pivotal questions about ethics morality inclusion and human learning at a time when students are already reckoning with public health crises systemic injustice and other connected challenges This book helps teachers examine the pros and cons of artificial intelligence as used by both educators and students as well as its implications for meaningful culturally responsive teaching and social emotional learning efforts Featuring activities lesson plans and discussion and writing prompts for use with adolescent learners each chapter offers concrete pedagogical approaches and instructional innovations that align technological changes with learning objectives in ways that advance rather than replace or neutralize attention to equity and well being *The PMM's Prompt Playbook* David E.
