Expert Ai Video Editing Software For Beginners For Teachers:

Learning With Technology Mason Ross, AI, 2025-02-22 *Learning With Technology* explores the transformative role of technology in modern education moving beyond mere digitization to examine how technology can augment traditional teaching methods. It investigates digital education trends, the effective integration of educational apps, and their impact on student learning outcomes. The book highlights that the true potential of technology lies in fostering personalized learning and equitable access rather than simply replacing established practices. For instance, while technology offers tools for personalized learning, the book emphasizes the importance of addressing digital equity to ensure all students benefit. The book is structured in three parts: beginning with an introduction to digital education's current state, followed by a discussion of practical applications of digital tools, and concluding with an analysis of future trends like AI and virtual reality. Its multidisciplinary approach, combining pedagogical theory with empirical research, makes it a valuable resource. The book delves into the ethical considerations surrounding data privacy and security, as well as the ongoing debates about online learning effectiveness, offering a comprehensive understanding of the field.

Management and Information Technology in the Digital Era Nawal Chemma, Mohammed El Amine Abdelli, Anjali Awasthi, Emmanuel Mogaji, 2022-09-30 *Management and Information Technology in the Digital Era: Challenges and Perspectives* explores the management and practical implications of digital information management to provide theoretical insight for managers and researchers to co-create their technology values and better understand its prospects and challenges.

Postdigital (Re)Imaginations Petar Jandrić, Juha Suoranta, Marko Teräs, Hanna Davis, 2025-10-31 This edited volume presents the latest achievements of postdigital scholarship in the field of future studies. Showing that current policy frameworks are dominated by capitalist imaginaries, the book insists on the development of radically different futures. This task is approached in five different ways. The book begins with an overview of the many ways to approach postdigital imaginaries as emancipatory practices, followed by some urgent reimaginings of older ideas. It moves on to critiques of current practices, policies, and imaginaries and develops postdigital research methods for the development of emancipatory educational imaginaries. Showcasing some recent interventions in educational politics, policy, and practice, it links presented work on postdigital imaginaries with recent postdigital inquiry related to the geopolitics of postdigital educational development. This book is suited for educators, policy makers, and any researcher fascinated by the unbounding of education from capitalist imaginaries and reframing it within an emancipatory future.
