

Four Core Facets to REMOTE WORK SUCCESS

1 COMPUTER SKILLS

Having a working understanding of the technology needed to be successful on the job including basic navigation, internet browsers, email, chat, search, and windows is crucial to remote success.

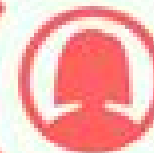

76% of workers
would be more willing to stay with their current employer if they could work flexible hours.

+1.4 days of work
in additional days per month worked by remote employees compared to their in-office peers. That's 17 additional workdays a year.

2 SELF-RELIANCE

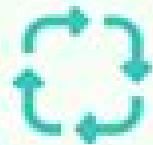

Remote workers must be able to work autonomously. They should be comfortable with isolation and possessing the self-motivation required to work and solve issues alone, without direct supervision or physical access to co-workers.

Communicating via remote means is also a key factor, as is the ability to understand and identify the subtleties of written (vs. verbal) communication.

3 PROPER WORK ENVIRONMENT

Maintaining a dedicated home/work environment that is organized, distraction-free, as well as properly connected and equipped make the transition to remote work much smoother for all.

25% less turnover
reported by companies that allow employees to work remotely for any duration, compared to those that do not.

+24% happier
and more productive as reported by those who work remotely at least once per month.

4 TIME MANAGEMENT

Staying on task without direct supervision is more than an exercise in self-control. Remote workers who can monitor oneself, prioritize, and ensure adherence to schedules are .

Building Tomorrow's Biomedical Workforce: Evaluation of How Evidence-Based Training Programs Align Skill Development and Career Awareness with a Broad Array of Professions Adriana Bankston, Rebekah L. Layton, Audra Van Wart, 2025-08-27 Building the future STEM workforce requires robust federal investments to support the next generation of innovators as well as systemic changes to enable graduate and postdoctoral researchers to transition with confidence into the biomedical workforce This effort involves the transformation of the biomedical research enterprise and training environment at all levels

but especially at the predoctoral and postdoctoral levels Innovative initiatives in education and training as well as career and professional development of biomedical trainees are necessary to build upon the robust biomedical workforce of today and create and sustain a diverse innovative and highly trained biomedical workforce of tomorrow An important aspect of supporting the biomedical workforce relates to changes within training and the research enterprise with opportunities for reimagining what STEM education should look like at different levels including providing agency for junior scientists in the field The future of the field should focus on inclusivity supporting trainees from different backgrounds and with diverse perspectives including but not limited to intersectional identities in race ethnicity gender sexual orientation first generation status and international talent in STEM This requires critical policy changes in order to support the transition of biomedical research professionals into the labor market *Telework Centers* Franklin D.
