

Absorption Costing or Full Costing System:

Definition and explanation:

Absorption costing is a costing system which treats all costs of production as product costs, *regardless of them being variable or fixed*. The cost of a unit of product under absorption costing method consists of direct materials, direct labor and both variable and fixed overhead. Absorption costing allocates a portion of fixed manufacturing overhead cost to

each unit of product, along with the variable manufacturing cost. Because absorption costing includes all costs of production as product costs, it is frequently referred to as *full costing method*.

Marginal, Variable or Direct Costing:

Definition and explanation:

Variable costing is some time referred to as *direct costing* or *marginal costing*. It is a costing system under which those costs of production that vary with output are treated as product costs. This would usually include direct materials, direct labor and variable portion of manufacturing overhead. *Fixed manufacturing cost is not treated as a product costs under variable costing*. Rather, fixed manufacturing cost is treated as a period cost and, like selling and administrative expenses, it is charged off in its entirety against revenue each period. Consequently the cost of a unit of product in inventory or cost of goods sold under this method does not contain any fixed overhead cost. To complete this summary comparison of absorption and variable costing, we need to consider briefly the handling of **selling and administrative expenses**. These expenses are never treated as product costs, regardless of the costing method in use. Thus under either absorption or variable costing, both variable and fixed selling and administrative expenses are always treated as period costs and deducted from revenues as incurred.

The concepts explained so far are illustrated below

| Cost classifications--Absorption versus variable costing | | |
|--|---|------------------|
| Absorption Costing | | Variable Costing |
| Product cost | Direct materials Direct Labor Variable Manufacturing overhead | Product cost |
| | Fixed manufacturing overhead | |
| Period cost | Variable selling and administrative expenses | Period cost |

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
