The Mathematics Student, 1979 Steiner Trees in Industry Xiuzhen Cheng, Ding-Zhu Du, 2013-12-01 This book is a collection of articles studying various Steiner tree problems with applications in industries such as the design of electronic circuits computer networking telecommunication and perfect phylogeny The Steiner tree problem was initiated in the Euclidean plane Given a set of points in the Euclidean plane the shortest network interconnecting the points in the set is called the Steiner minimum tree The Steiner minimum tree may contain some vertices which are not the given points Those vertices are called Steiner points while the given points are called terminals The shortest network for three terminals was first studied by Fermat 1601-1665 Fermat proposed the problem of finding a point to minimize the total distance from it to three terminals in the Euclidean plane The direct generalization is to find a point to minimize the total distance from it to n terminals which is still called the Fermat problem today The Steiner minimum tree problem is an indirect generalization Schreiber in 1986 found that this generalization i.e. the Steiner minimum tree was first proposed by Gauss
