Accelerated Testing Nature And Artificial Weathering In The Coatings Industry:

Accelerated Testing Ulrich Schulz, 2008-12-17 From the Foreword Accelerated Testing Nature and Artificial Weathering in the Coatings Industry is aimed at all those involved or interested in creating producing applying and testing modern high quality coatings for outdoor use Coatings are exposed to a great many severe natural stresses that cause a gradual deterioration of the properties which are responsible for the coatings very quality Nevertheless buyers expect coated products to remain in an as new condition which is mostly characterised by a highly attractive appearance and intact surface for as long as possible This calls for coatings of high weatherability and long service life In this book accelerated testing through its simulation of the destructive action of natural weathering is the means for testing this coating quality Test engineers shoulder much responsibility because not only must the results form the basis for reliable predictions but they must also be obtained economically and as quickly as possible Their results are the dominant factor in any decision to take a new coating creation into series production Accelerated testing has become an indispensable tool in the paint and coatings chemistry as a means of avoiding nasty surprises by coatings in normal use Other methods of predicting service life are still too unreliable given the extent of current weathering knowledge Modern day high quality coatings are highly complex systems which contain numerous essential additives Not surprisingly coatings chemistry is therefore sometimes jokingly likened to alchemy But natural weathering in all its random manifestations of different impact is equally complex Words alone cannot describe how best to simulate the team like interaction of such a complex system in the laboratory There is more to successful simulation than applying a standardized test method or switching on a fully controlled weathering device which has been marketed as an all rounder It takes know how experience and skill This book will help such abilities to be acquired

Coated and Laminated Textiles for Aerostats and Airships Mangala Joshi, 2022-03-28 This book covers material challenges and technology innovation in coated and laminated textiles for aerostats and airships Aerostats airships are lighter than air LTA aircraft which are generally used in defence applications and face many harsh environmental conditions For sustaining such conditions there are special requirements for the material to be used in aerostats airships which generally include a multi layered coated laminated textile using a textile fabric in base layer and different polymers for coating lamination Therefore this book covers typical materials developed by different countries challenges for developing material for aerostat airship envelope and the future scope Features Exclusive title on materials used for LTA envelopes Discusses material challenges such as selection of suitable fibre polymer additive coating lamination techniques joint type and sealing techniques Includes typical materials developed by different companies and researchers worldwide Clearly explains technical concepts using figures schemes and tabulated data Includes case studies on material developed for aerostats airships by different countries including NASA Lockheed Martin JAXA ADRDE and DRDO This book is aimed at graduate students researchers and professionals in textiles engineering and aerospace engineering
