accounting and finance literature has evolved to include multivariate based models in financial analysis and these models can be used to explain important economic events and often predict them Thus in an exhaustive coverage of the economic events to which they can be applied Riahi Belkaoui discusses these models in a way that will have special value to corporate management financial planners and to their colleagues in the academic community who specialize in business and economic analysis Solutions Manual for Accounting Theory Ahmed Riahi-Belkaoui,1981 **Accountants' Handbook, Financial Accounting and General Topics** D. Riahi-Belkaoui,1995-05-30 An important but usually overlooked variable that affects the process and product of accounting is culture Consensus on what constitutes proper accounting methods and behavior varies among countries and it is this cultural relativism and its impacts that Riahi Belkaoui explores here His purpose is to elaborate on the nature of cultural relativism in accounting and in the interpretation of accounting data He thus shows the way culture determines accounting judgments and explains the intercultural differences in the perception of accounting concepts and in the field s self regulation

internationally His point is that accounting is actually a cultural rather than a technical process and that professionals as well as academics should be aware of this A challenging useful discussion for teachers graduate students and accounting practitioners particularly in international settings
