With the rapid growth of the World Wide Web and on-line information services, more and more information is available and accessible on-line. This explosion of information has resulted in a well-recognized information overload problem. There is no time to read everything, and yet we have to make critical decisions based on whatever information is available. The technology of automatic text summarization is indispensable. **Advances in Automatic Text Summarization** Inderjeet Mani, Mark T. Maybury, 1999. Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus Based Approaches, Exploiting Discourse Structure, Knowledge Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Contributors: D. A. Adams, C. Aone, R. Barzilay, E. Bloedorn, B. Boguraev, R. Brandow, C. Buckley, F. Chen, M. J. Chrzanowski, H. P. Edmundson, M. Elhadad, T. Firmin, R. P. Futrelle, J. Gorlinsky, U. Hahn, E. Hovy, D. Jang, K. Sparck Jones, G. M. Kasper, C. Kennedy, K. Kukich, J. Kupiec, B. Larsen, W. G. Lehnert, C. Lin, H. P. Luhn, I. Mani, D. Marcu, M. Maybury, K. McKeown, A. Merlino, M. Inderjeet Mani, Mark T. Maybury, 1999. [Advances in Artificial Intelligence](#). Canadian Society for Computational Studies of Intelligence. Conference, 2001. [Concise Encyclopedia of Semantics](#). Keith Allan, 2010-04-06. Concise Encyclopedia of Semantics is a comprehensive new reference work aiming to systematically describe all aspects of the study of meaning in language. It synthesizes in one volume the latest scholarly positions on the construction, interpretation, clarification, obscurity, illustration, amplification, simplification, negotiation, contradiction, contraction, and paraphrasing of meaning, and the various concepts, analyses, methodologies, and technologies that underpin their study. It examines not only semantics but the impact of semantic study on related fields such as morphology, syntax, and typologically oriented studies such as grammatical semantics, where semantics has made a considerable contribution to our understanding of verbal categories like tense or aspect, nominal categories like case or possession, clausal categories like causatives, comparatives, or conditionals, and discourse phenomena like reference and anaphora. COSE also examines lexical semantics and its relation to syntax, pragmatics, and cognitive linguistics, and the study of how logical semantics develops and thrives often in interaction with computational linguistics. As a derivative volume from Encyclopedia of Language and Linguistics, Second Edition, it comprises contributions from 150 of the foremost scholars of semantics in their various specializations and draws on 20 years of development in the parent work.

in a compact and affordable format Principally intended for tertiary level inquiry and research this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages As semantics is a centrally important and inherently cross cutting area within linguistics it will therefore be relevant not just for semantics specialists but for most linguistic audiences The first encyclopedia ever published in this fascinating and diverse field Combines the talents of the world s leading semantics specialists The latest trends in the field authoritatively reviewed and interpreted in context of related disciplines Drawn from the richest most authoritative comprehensive and internationally acclaimed reference resource in the linguistics area Compact and affordable single volume reference format

Automatic Text Summarization Juan-Manuel Torres-Moreno,2014-11-10 Textual information in the form of digital documents quickly accumulates to create huge amounts of data The majority of these documents are unstructured it is unrestricted text and has not been organized into traditional databases Processing documents is therefore a perfunctory task mostly due to a lack of standards It has thus become extremely difficult to implement automatic text analysis tasks Automatic Text Summarization ATS by condensing the text while maintaining relevant information can help to process this ever increasing difficult to handle mass of information This book examines the motivations and different algorithms for ATS The author presents the recent

state of the art before describing the main problems of ATS as well as the difficulties and solutions provided by the community The book provides recent advances in ATS as well as current applications and trends The approaches are statistical linguistic and symbolic Several examples are also included in order to clarify the theoretical concepts
