The Strange Life of Nikola Tesla Nikola Tesla, 2020-09-28 The progressive development of man is vitally dependent on invention It is the most important product of his creative brain Its ultimate purpose is the complete mastery of mind over the material world the harnessing of the forces of nature to human needs This is the difficult task of the inventor who is often misunderstood and unrewarded But he finds ample compensation in the pleasing exercises of his powers and in the knowledge of being one of that exceptionally privileged class without whom the race would have long ago perished in the bitter struggle against pitiless elements Speaking for myself I have already had more than my full measure of this exquisite enjoyment so much that for many years my life was little short of continuous rapture I am credited with being one of the hardest workers and perhaps I am if thought is the equivalent of labor for I have devoted to it almost all of my waking hours But if work is interpreted to be a definite performance in a specified time according to a rigid rule then I may be the worst of

idlers Every effort under compulsion demands a sacrifice of life energy I never paid such a price On the contrary I have thrived on my thoughts In attempting to give a connected and faithful account of my activities in this story of my life I must dwell however reluctantly on the impressions of my youth and the circumstances and events which have been instrumental in determining my career Our first endeavors are purely instinctive promptings of an imagination vivid and undisciplined As we grow older reason asserts itself and we become more and more systematic and designing But those early impulses though not immediately productive are of the greatest moment and may shape our very destinies Indeed I feel now that had I understood and cultivated instead of suppressing them I would have added substantial value to my bequest to the world But not until I had attained manhood did I realize that I was an inventor This was due to a number of causes In the first place I had a brother who was gifted to an extraordinary degree one of those rare phenomena of mentality which biological investigation has failed to explain His premature death left my earth parents disconsolate I will explain my remark about my earth parents later We owned a horse which had been presented to us by a dear friend It was a magnificent animal of Arabian breed possessed of almost human intelligence and was cared for and petted by the whole family having on one occasion saved my dear father s life under remarkable circumstances My father had been called one winter night to perform an urgent duty and while crossing the mountains infested by wolves the horse became frightened and ran away throwing him violently to the ground It arrived home bleeding and exhausted but after the alarm was sounded immediately dashed off again returning to the spot and before the searching party were far on the way they were met by my father who had recovered consciousness and remounted not realizing that he had been lying in the snow for several hours This horse was responsible for my brother s injuries from which he died I witnessed the tragic scene and although so many years have elapsed since my visual impression of it has lost none of its force The recollection of his attainments made every effort of mine seem dull in comparison Anything I did that was creditable merely caused my parents to feel their loss more keenly So I grew up with little confidence in myself
