## Ultimate Remote Jobs Usa For Beginners With Low Investment:

**Estimating Digital Infrastructure Investment Needs to Achieve Universal Broadband** Edward Oughton, Mr. David Amaglobeli, Mr. Mariano Moszoro, 2023-02-10 We develop a detailed model to evaluate the necessary investment requirements to achieve affordable universal broadband The results indicate that approximately 418 billion needs to be mobilized to connect all unconnected citizens globally targeting 40 50 GB Month per user with 95 percent reliability The bulk of additional investment is for emerging market economies 73 percent and low income developing countries 24 percent We also find that if the data consumption level is lowered to 10 20 GB Month per user the total cost decreases by up to about half whereas raising data consumption to 80 100 GB Month per user leads to a cost increase of roughly 90 percent relative to the baseline Moreover a 40 percent cost decrease occurs when varying the peak hour quality of service level from the baseline 95 percent reliability to only 50 percent reliability To conclude broadband policy assessments should be explicit about the quantity of data and the reliability of service provided to users Failure to do so will lead to inaccurate estimates and ultimately to poor broadband policy decisions
