Middleware Solutions for Wireless Internet of Things Paolo Bellavista, Carlo Giannelli, Sajal K. Das, Jiannong Cao, 2019-07-15 The proliferation of powerful but cheap devices together with the availability of a plethora of wireless technologies has pushed for the spread of the Wireless Internet of Things WIoT which is typically much more heterogeneous dynamic and general purpose if compared with the traditional IoT The WIoT is characterized by the dynamic interaction of traditional infrastructure side devices e.g. sensors and actuators provided by municipalities in Smart City infrastructures and other portable and more opportunistic ones such as mobile smartphones opportunistically integrated to dynamically extend and enhance the WIoT environment A key enabler of this vision is the advancement of software and middleware technologies in various mobile related sectors ranging from the effective synergic management of wireless communications to mobility adaptivity support in operating systems and differentiated integration and management of devices with heterogeneous capabilities in middleware from horizontal support to crowdsourcing in different application domains to dynamic offloading to cloud resources only to mention a few The book presents state of the art contributions in the articulated WIoT area by providing novel insights about the development and adoption of middleware solutions to enable the WIoT vision in a wide spectrum of heterogeneous scenarios ranging from industrial environments to educational devices The presented solutions provide readers with differentiated point of views by demonstrating how the WIoT vision can be applied to several aspects of our daily life in a pervasive manner

Advances in the Internet of Things Qusay Hassan, 2025-07-17 Many reports estimated that in 2024 the number of Internet of Things IoT devices exceeded 18 billion worldwide with predictions suggesting that it could reach nearly 40 billion by 2033 Despite primarily being consumer devices a growing number of them will find use in industrial and enterprise applications

This shows the significance of IoT and how it shapes the future. However, to realize its full potential, we must address its emerging challenges and highlight recent applications, advances, and trends, which is the focus of this book. Security and privacy represent some of the key challenges IoT adopters face. The severity of these issues is exacerbated by the growing number of IoT devices, the expansion of Industry 4.0 and the emergence of Industry 5.0, and the significant increase in cybersecurity attacks. Considering that ensuring security and privacy is crucial for the successful adoption of IoT, this book dedicates several chapters to these areas. This book also introduces some novel models that improve IoT environments and presents several practical implementations that utilize IoT to demonstrate some of its real-world applications. Furthermore, it examines several emerging technologies that enable the realization of advanced IoT environments. We see most IoT advances in three main areas: the integration of artificial intelligence, machine learning, network technologies, and hardware design. Therefore, this book dedicates several chapters to these areas. Most chapters touch on artificial intelligence, machine learning, emphasizing the significance of these technologies in today's and next-generation applications. The main objective of this book is to capture the state of the art in IoT and explore some of its emerging challenges, solutions, and technologies. This peer-reviewed book serves as a reference for researchers, academics, practitioners, and graduate-level students.

High-Performance Computing and Networking Peter Sloot, Marian Bubak, Alfons Hoekstra, Bob Hertzberger, 1999-03-30. This book constitutes the refereed proceedings of the 7th International Conference on High Performance Computing and Networking (HPCN Europe 1999) held in Amsterdam, The Netherlands, in April 1999. Also included are 40 selected poster presentations. The conference papers are organized in three tracks: end-user applications of HPCN, computational science, and computer science. Additionally, there are six sections corresponding to topical workshops. The Cache Coherence Problem in Shared-Memory Multiprocessors Igor Tartalja, Veljko Milutinović, 1996-02-13. The book illustrates state-of-the-art software solutions for cache coherence maintenance in shared memory multiprocessors. It begins with a brief overview of the cache coherence problem and introduces software solutions to the problem. The text defines and details static and dynamic software schemes, techniques for modeling performance, evaluation mechanisms, and performance evaluation studies. *Process Algebra and Probabilistic Methods*, 2002.
