Campante, Federico Sturzenegger, Andrés Velasco, 2021-10-11

Macroeconomic policy is one of the most important policy domains and the tools of macroeconomics are among the most valuable for policy makers Yet there has been up to now a wide gulf between the level at which macroeconomics is taught at the undergraduate level and the level at which it is practiced At the same time doctoral level textbooks are usually not targeted at a policy audience making advanced macroeconomics less accessible to current and aspiring practitioners This book born out of the Masters course the authors taught for many years at the Harvard Kennedy School fills this gap It introduces the tools of dynamic optimization in the context of economic growth and then applies them to a wide range of policy questions ranging from pensions consumption investment and finance to the most recent developments in fiscal and monetary policy It does so with the requisite rigor but also with a light touch and an unyielding focus on their application to policy making as befits the authors own practical experience Advanced Macroeconomics: An Easy Guide is bound to become a great resource for graduate and advanced undergraduate students and practitioners alike **Palgrave Handbook of**

Christophe Kamps, 2004-12-22 This book analyzes the dynamic macroeconomic effects of public capital in industrialized countries The issue of whether public capital is productive has received a great deal of recent attention Yet existing empirical analyses have been limited to a small set of countries This book presents a new database that provides internationally comparable capital stock estimates for 22 OECD countries for the 1960-2001 period Building on this database the book estimates the dynamic effects of public capital using a variety of econometric methods The results suggest that public capital is productive in OECD countries on average The theoretical analysis based on a dynamic general equilibrium model shows

that the effects of public capital depend crucially on the way the government chooses to finance additional spending
