Development of an Algorithm for the Taktline Layout of Synchronized Job Shop Production Antonia Fels, 2019-03-11 In job shop production the change towards synchronized job shop production which is based on the concept of so called taktlines has been shown to enhance efficiency In this dissertation an algorithm for the taktline layout is developed following a multi objective approach The algorithm consists of two sequential discrete optimizations problems namely a modified Substring Cover Problem and a partitioning Cluster Analysis including a Multiple Sequence Alignment For an overall validation real world data from tool manufacturers are subject to the proposed algorithm

An Introduction to the Analysis of Algorithms Robert Sedgewick, Philippe Flajolet, 2013-01-18 Despite growing interest basic information on methods and models for mathematically analyzing algorithms has rarely been directly accessible to practitioners researchers or students An Introduction to the Analysis of Algorithms Second Edition organizes and presents that knowledge fully introducing primary techniques and results in the field Robert Sedgewick and the late Philippe Flajolet have drawn from both classical mathematics and computer science integrating discrete mathematics elementary real analysis combinatorics algorithms and data structures They emphasize the mathematics needed to support scientific studies that can serve as the basis for predicting algorithm performance and for comparing different algorithms on the basis of performance Techniques covered in the first half of the book include recurrences generating functions asymptotics and analytic combinatorics Structures studied in the second half of the book include permutations trees strings tries and mappings Numerous examples are included throughout to illustrate applications to the analysis of algorithms that are playing a critical role in the evolution of our modern computational infrastructure Improvements and additions in this new edition include Upgraded figures and code An all new chapter introducing analytic
