**Airframe Structural Design** Chunyun Niu,2006      Airframe Structural Design Chunyun Niu,Ch'un-yün Niu,1988

*Advanced Aircraft Design* Egbert Torenbeek,2013-05-28 Although the overall appearance of modern airliners has not changed a lot since the introduction of jetliners in the 1950s their safety efficiency and environmental friendliness have improved considerably Main contributors to this have been gas turbine engine technology advanced materials computational aerodynamics advanced structural analysis and on board systems Since aircraft design became a highly multidisciplinary activity the development of multidisciplinary optimization MDO has become a popular new discipline Despite this the application of MDO during the conceptual design phase is not yet widespread *Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes* presents a quasi analytical optimization approach based on a concise set of sizing equations Objectives are aerodynamic efficiency mission fuel empty weight and maximum takeoff weight Independent design variables studied include design cruise altitude wing area and span and thrust or power loading Principal features of integrated concepts such as the blended wing and body and highly non planar wings are also covered The quasi analytical approach enables designers to compare the results of high fidelity MDO optimization with lower fidelity methods which need far less computational effort Another advantage to this approach is that it can provide answers to what if questions rapidly and with little computational cost Key features Presents a new fundamental vision on conceptual airplane design optimization Provides an overview of advanced technologies for propulsion and reducing aerodynamic drag Offers insight into the derivation of design sensitivity information Emphasizes design based on first principles Considers pros and cons of innovative configurations Reconsiders optimum cruise performance at transonic Mach numbers *Advanced Aircraft Design Conceptual Design Analysis and Optimization of Subsonic Civil Airplanes* advances understanding of the initial optimization of civil airplanes and is a must have reference for aerospace engineering students applied researchers aircraft design engineers and analysts

### **Collaborative Product and Service Life Cycle Management for a Sustainable World**

Richard Curran,Shuo-Yan Chou,Amy J. C. Trappey,2008-08-31 *Collaborative Product and Service Life Cycle Management for a Sustainable World* gathers together papers from the 15th ISPE International Conference on Concurrent Engineering CE2008 to stimulate the new thinking that is so crucial to our sustained productivity enhancement and quality of life It is already evident in this new century that the desire for sustainable development is increasingly driving the market to reach for new and innovative solutions that more effectively utilize the resources we have inherited from previous generations with the obvious responsibility to future generations Human productivity and progress can be positively engineered and managed in harmony with the provision and needs of our natural environment One century on from the industrial revolution this is now the time of the sustainable revolution requiring holistic technological process and people integrated solutions to sustained socio economic enhancement

**Information Sources in Engineering** Roderick A. Macleod,Jim Corlett,2012-04-17 The

current thoroughly revised and updated edition of this approved title evaluates information sources in the field of technology. It provides the reader not only with information of primary and secondary sources but also analyses the details of information from all the important technical fields including environmental technology, biotechnology, aviation and defence, nanotechnology, industrial design, material science, security and health care in the workplace as well as aspects of the fields of chemistry, electro technology and mechanical engineering. The sources of information presented also contain publications available in printed and electronic form such as books, journals, electronic magazines, technical reports, dissertations, scientific reports, articles from conferences, meetings and symposiums, patents and patent information, technical standards, products, electronic full text services, abstract and indexing services, bibliographies, reviews, internet sources, reference works and publications of professional associations. **Information Sources in Engineering** is aimed at librarians and information scientists in technical fields as well as non professional information specialists who have to provide information about technical issues. Furthermore, this title is of great value to students and people with technical professions.

**ICAF 2019 - Structural Integrity in the Age of Additive Manufacturing** Antoni Niepokolczycki, Jerzy Komorowski, 2019-07-03. This book gathers papers presented at the 36th conference and 30th Symposium of the International Committee on Aeronautical Fatigue and Structural integrity. Focusing on the main theme of Structural Integrity in the Age of Additive Manufacturing, the chapters cover different aspects concerning research developments and challenges in this field, offering a timely reference guide to designers, regulators, manufacturer and both researchers and professionals of the broad aerospace community.

**Care and Repair of Advanced Composites** Keith B Armstrong, Graham Bevan, William Cole, 2005-06-22. This second edition has been extensively updated to keep pace with the growing use of composite materials in commercial aviation. A worldwide reference for repair technicians and design engineers, the book is an outgrowth of the course syllabus that was developed by the Training Task Group of SAE's Commercial Aircraft Composite Repair Committee (CACRC) and published as SAE AIR 4938 Composite and Bonded Structure Technician Specialist Training Document. Topics new to this edition include Nondestructive Inspection (NDI) Methods, Fasteners for Composite Materials, A Method for the Surface Preparation of Metals Prior to Adhesive Bonding, Repair Design. Although this book has been written primarily for use in aircraft repair, other applications including marine and automotive are also covered.

**New Trends in Civil Aviation** Vladimir Socha, Lenka Hanáková, Andrej Lališ, 2018-06-27. The NTCA conference series is dedicated to publishing peer reviewed proceedings of the conference. The goal is to disseminate state of the art scientific results available in the domain of civil aviation. These proceedings contain a collection of scientific contributions to the NTCA 2017 conference which took place in Prague from 7-8 December 2017 and was hosted by the Department of Air Transport, Czech Technical University in Prague, with the cooperation of the Faculty of Aeronautics, Technical University of Košice, Institute of Aerospace Engineering, Brno University of Technology, Air Transport Department, University of Ilina and the Czech Aerospace Society. The NTCA conference aims to build and extend a platform

for interaction between communities interested in aviation problems and applications NTCA 2017 followed this established practice and provided room for discussing and sharing views on the current issues in the field of aviation As a result these proceedings include contributions on air transport operations air traffic management and economic aspects aviation safety and security aircraft technologies unmanned aerial systems human factors and ergonomics in aviation **38th**
