

Writing Models Quadratic Functions Given Tables

This worksheet asks students to write equations of quadratic functions given tables. It also asks students to identify the domain and range of the function.

This worksheet goes with: Chapter 5 of the Prentice Hall Algebra 2 Book OR Chapter 10 of the Prentice Hall Algebra 1 Book.

This worksheet uses the following CCSS:

A-CED.1 Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.

F-IF.2 Graph functions expressed symbolically and identify key features of the graph, by hand in simple cases and using technology for more complicated cases. □

a. Graph linear and quadratic functions and other tabular data, verbally, and verbally.

F-BF.3 Write a function that describes a relationship between two quantities. □

Note: I use this worksheet to help not only with modeling, but also with key features. The last step to write a model is to use the key features given to plot the best form.

QUADRATIC EQUATIONS AND FUNCTIONS WORKBOOK is a resource that Algebra 2 students can use to practice solving
quadratic equations writing quadratic equations graphing quadratic functions writing quadratic functions and solving word
problems that involve quadratic equations and functions There are nine sections in this workbook Example problems with
step by step solutions precede each type of problem for sections one through nine Students should study these examples
before starting the problems This workbook also contains the step by step solutions for all problems Section 1 begins with
problems for students to use square roots to solve quadratic equations in simplest terms The denominator for answers is
rationalized In Section 2 students solve quadratic equations by factoring and by using the Zero Product Property Section 3
includes problems where students solve quadratic equations by completing the square This workbook contains the derivation
of the Quadratic Formula In Section 4 students use the Quadratic Formula to solve quadratic equations This workbook
includes the derivation of the sum and product of roots for a quadratic equation in standard form Section 5 is where students
write quadratic equations given their roots Students can use the Zero Product Property or the sum and product of its roots to
do these problems In Section 6 students explain why the graph of the quadratic function which is called a Parabola will open
upward or downward Then they determine if the graph will have a minimum or a maximum Section 7 is where students
graph quadratic functions that are in standard factored and vertex form In Section 8 students use the coordinates for points
on the graph of a quadratic function to write the quadratic function in factored vertex and standard form Section 9 is where
students solve word problems that involve quadratic equations and quadratic functions Finally there are step by step
solutions for all problems ABOUT THE AUTHOR Teaching Experience Norman just finished his 27th year as a high school
