Name _____	Date _____
Alligators	
	
Alligators are found in various parts of the world, but they are most commonly associated with the southeastern United States and parts of Central and South America. Read the passage and answer the questions.	
Alligators belong to the crocodilian family, which also includes crocodiles and caimans. They have a distinctive appearance with a broad, rounded snout and a set of sharp teeth. One of the most unique features of alligators is their armored body, covered in tough, bony scales. This armor not only provides protection but also helps them regulate their body temperature.	
Alligators are well-adapted to their aquatic lifestyle. They are excellent swimmers and have webbed feet that enable them to move gracefully through the water. Despite their seemingly slow movements on land, alligators can be surprisingly fast and agile in the water. They use their powerful tails to propel themselves forward, making them efficient hunters.	
Spending a lot of time in the water, alligators are carnivorous, meaning they primarily eat meat. Their diet includes fish, turtles, birds, and even mammals that venture too close to the water's edge.
