

Revamping India's National Security Structure: Agenda for the Indian Government

Arun Vishwanathan

Assistant Professor, National Institute of Advanced Studies¹

The 2014 elections for the Sixteenth Lok Sabha saw the Indian electorate delivering a positive, decisive mandate to a single party after a gap of almost three decades. An important area which is in need for urgent attention from the Narendra Modi-government is India's national security structure. Despite past efforts at reform, India's national security structure continues to be plagued by absence of coordination, turf battles and paucity of human resources. Many of these problems are symptomatic of systemic ills which therefore require a holistic relook.

In order for India to achieve its national interests it should be able to work in a coordinated fashion. This necessitates a holistic revamping of the existing national security apparatus and its workings. Putting in place a mechanism that develops long-term strategies and coordinates their execution is imperative as is and strengthening the National Security Advisor's (NSA's) support structure. In addition, such a revamp should also include reforms to the existing higher defence organisation and intelligence setup. This brief will flag some of the important issues the incoming government needs to focus on in order to strengthen India's national security architecture.

India's Grand Strategy and Foreign Policy Bernhard Beitelmair-Berini, 2021-07-15 The book explores the competing grand strategic worldviews shaping India s foreign and security policies by analyzing the interaction between normative modern international relations theories and vernacular concepts of statecraft and strategy To assess the diverse competing ideas which characterize India s debates on grand strategy and foreign policy the author presents the subculture cleavage model of grand strategic thought This innovative analytical framework reveals the complexities of India s strategic pluralism and offers the building blocks for a systematic analysis of grand strategy formation The book demonstrates that the strategic paradigms or strategic subcultures are marked by contending ideas of Indian statehood and civilization held by policymakers and the informed public and are a result of ideology driven perceptions of the country s strategic environment The author argues that the apparent hybridization and stretching of modern and traditional concepts of international relations in India has become a widespread feature of Indian foreign policy to meet the needs of state formation and nation building A unique approach to organizing and understanding the debates and discourse in Indian strategic thinking the book will be of interest to specialists and students in the field of International Relations political theory South Asian Studies and India s foreign and security policy

 Olson,2009 On September 11 2001 America s 700 000 law enforcement officers were forcefully introduced to a new era in
 policing after Islamist terrorists perpetrated the most savage and horrific terrorist violence ever on American soil In spite of
 the post 9 11 proliferation of information about Islamist terrorism many law enforcement officers remain uninformed about
 the nature scope and reality of this threat Even the FBI America s lead law enforcement agency in the struggle against
 Islamist terrorism fails to arm its agents with accurate and comprehensive information to understand this patient merciless
 and fanatical foe This manual was prepared to address this knowledge void by explaining the underlying politico religious
 motivations that drives Islamist terrorism It contains chapters that explain Islamist terrorism and describe the history of
 Islam and the Prophet Muhammad The tenets of Islam and the ideology used to justify terrorist atrocities ranging from
 suicide homicide bombings in Israel to the slaughter of school children in Beslan Russia are documented The history of Jihad
 the oldest and most successful international Islamist group in the world and how this group has established an effective
 subversive apparatus in America that works tirelessly to dismantle our democratic freedoms is described The text explains
 that by using a soft form of Jihad this group seeks to destroy Western ideals and democracy with the goal of replacing them
 with a fascist totalitarian ideology to obtain world domination and the forced imposition of a seventh century politico
 religious system of law The radicalization process that can lead apparently well integrated Muslim citizens to terrorism is
 discussed including the Taliban and al Qaeda terrorist groups A summary of comprehensive information detailing the Islamist

comparative perspective It has papers written by sociologists anthropologists and political scientists rather than economists so the emphasis is on cultural shifts rather than economic statistics The major contribution of this volume is that these two emerging powers of Asia are not as is usual compared to the West but with each other Considering that these two societies have so much in common in scale civilization history and as emerging economies the book is timely The focus of the book is on the social and political implications of the new consumption patterns among the middle classes of India and China in the context of economic growth liberalization of markets and globalization Reflecting upon and critically engaging with the traditional sociological notions on which definitions of the middle class have been based the book analyzes the intermingling of these notions with new attitudes in the wake of the consumer revolution More specifically an entire gamut of aspects of the consumer culture have been explored tourism leisure activities and the entertainment industry art Karaoke and soap operas as well as the consumption of experiences through these It is argued that these phenomena have particular Indian and Chinese incarnations which need to be analyzed in a manner that does not privilege a limited western experience of globalization With its fresh insights and perspectives the book will appeal to students of anthropology sociology political science media studies and cultural studies It will also be useful for market research professionals **Journal of**
