Euro-Par 2018: Parallel Processing Workshops Gabriele Mencagli, Dora B. Heras, Valeria Cardellini, Emiliano Casalicchio, Emmanuel Jeannot, Felix Wolf, Antonio Salis, Claudio Schifanella, Ravi Reddy Manumachu, Laura Ricci, Marco Beccuti, Laura Antonelli, José Daniel Garcia Sanchez, Stephen L. Scott, 2018-12-31 This book constitutes revised selected papers from the workshops held at 24th International Conference on Parallel and Distributed Computing Euro Par 2018 which took place in Turin Italy in August 2018 The 64 full papers presented in this volume were carefully reviewed and selected from 109 submissions Euro Par is an annual international conference in Europe covering all aspects of parallel and distributed processing These range from theory to practice from small to the largest parallel and distributed systems and infrastructures from fundamental computational problems to full edged applications from architecture compiler language and interface design and implementation to tools support infrastructures and application performance aspects Intelligent Energy Demand Forecasting Wei-Chiang Hong, 2013-03-12 As industrial commercial and residential demands increase and with the rise of privatization and deregulation of the electric energy industry around the world it is necessary to improve the performance of electric operational management Intelligent Energy Demand Forecasting offers approaches and methods to calculate optimal electric energy allocation to reach equilibrium of the supply and demand Evolutionary algorithms and intelligent analytical tools to improve energy demand forecasting accuracy are explored and explained in relation to existing methods To provide clearer picture of how these hybridized evolutionary algorithms and intelligent analytical tools are processed Intelligent Energy Demand Forecasting emphasizes on improving the drawbacks of existing algorithms Written for researchers postgraduates and lecturers Intelligent Energy Demand Forecasting helps to develop the skills and methods to provide more accurate energy demand forecasting by employing novel hybridized evolutionary algorithms and intelligent analytical tools Probabilistic Prediction of Energy Demand and Driving Range for Electric Vehicles with Federated Learning Thorgeirsson, Adam Thor, 2024-09-03 In this work an extension of the federated averaging algorithm FedAvg Gaussian is applied to train probabilistic neural networks The performance advantage of probabilistic prediction models is demonstrated and it is shown that federated learning can improve driving range prediction Using probabilistic predictions routing and charge planning based on destination attainability can be applied Furthermore it is shown that probabilistic predictions lead to reduced travel time **Smart Manufacturing with AIoT** Keyurkumar Patel, Ankit D. Oza, Ankit Sharma, Archana Mantri, Hreetabh Kishore, 2025-12-17 As industries move toward intelligent adaptive and efficient manufacturing processes the integration of artificial intelligence AI Internet of Things IoT signal processing and computer vision is crucial This book serves as a comprehensive guide for professionals researchers and academics seeking to leverage the power of cutting edge technologies in the field of smart manufacturing Smart Manufacturing with AIoT Signal Processing Computer Vision and Data Analytics is a comprehensive guide that focuses on practical implementation bridging the gap

between theoretical concepts and real world applications Each chapter of this book explores a different aspect of the synergy between AI IoT signal processing and computer vision starting with foundational concepts and progressing toward advanced applications From enhancing quality control processes to implementing proactive maintenance strategies and enabling dynamic threat assessment this book covers a wide range of topics that define the contemporary landscape of smart manufacturing This book explores the intricate details of AIoT signal processing and computer vision providing valuable insights for both beginners and experienced professionals in the field Readers will gain actionable knowledge that empowers them to implement transformative solutions in their smart manufacturing environments Frontier Research: Road and **Traffic Engineering** Teik-Hua Law, Baohua Guo, 2022-11-01 This book contains selected papers resulting from the 2020 International Conference on Road and Traffic Engineering CRTE 2020 covering Road Engineering and Traffic Engineering aiming to provide an academic and technical communication platform for scholars and engineers engaged in scientific research and engineering practice in the field of Road Engineering and Materials Traffic Engineering and Management and Transportation Engineering By sharing the research status of scientific research achievements and cutting edge technologies it helps scholars and engineers all over the world to comprehend the academic development trends and broaden research ideas So as to strengthen international academic research academic topics exchange and discussion and promote the industrialization cooperation of academic achievements Advances in Energy and Environment Research Bachir Achour, Qiyan Wu, 2017-01-19 The 2016 International Conference on Advances in Energy and Environment Research ICAEER 2016 took place on August 12 14 2016 in Guangzhou China ICAEER 2016 has been a meeting place for innovative academics and industrial experts in the field of energy and environment research The primary goal of the conference is to promote research and developmental activities in energy and environment research and further to promote scientific information exchange between researchers developers engineers students and practitioners working all around the world The conference will be organized every year making it an ideal platform for people to share views and experiences in energy and environment research and related areas ICAEER 2016 is dedicated to presenting and publishing novel and fundamental advances in energy and environment research fields Scholars and specialists on ICAEER 2016 originating from over 10 countries or regions have shared their knowledge and interesting research results During the conference an international stage was prepared for the participants to present their theoretical studies and practical applications Artificial <u>Intelligence in Business</u> Pavankumar Gurazada & Seema Gupta, Artificial Intelligence in Business is transforming the way organizations operate driving innovation increasing efficiency and enabling smarter data driven decision making Yet for many professionals and students the gap between complex technical concepts and practical business applications can feel overwhelming This book bridges that gap with clarity relevance and purpose Designed for MBA students business leaders and aspiring AI practitioners Artificial Intelligence in Business cuts through the hype to provide a grounded accessible and

actionable guide to real world AI From foundational principles like machine learning and deep learning to advanced applications in marketing finance supply chain and HR each chapter offers practical insights supported by real world use cases and code implementations Whether you re aiming to enhance customer engagement streamline operations or manage risk more effectively this book equips you with the knowledge and tools to apply AI strategically in a business context

Decision Making Using AI in Energy and Sustainability Gülgün Kayakutlu,M. Özgür Kayalica,2023-10-16 Artificial intelligence AI has a huge impact on science and technology including energy where access to resources has been a source of geopolitical conflicts AI can predict the demand and supply of renewable energy optimize efficiency in energy systems and improve the management of natural energy resources among other things This book explores the use of AI tools for improving the management of energy systems and providing sustainability with smart cities smart facilities smart buildings smart transportation and smart houses Featuring research from International Federation for Information Processing s IFIP AI in Energy and Sustainability working group this book provides new models and algorithms for AI applications in energy and sustainability fields Any short term mid term and long term forecasting optimization models trend foresights and prescriptions based on scenarios are studied in the energy world and the smart systems for sustainability The contents of this book are valuable for energy researchers academics scholars practitioners and policy makers
