range of disciplines analyse the nature of common sense and the consequent challenges of incorporating into artificial intelligence models. They look at different ways we might understand common sense and which of these ways are simulated within computer algorithms. These include sensory integration, self-evident truths, rhetorical common places and mutuality and intentionality of actors within a moral community. How far are these possible features within and of machines? Approaching from a range of perspectives including Sociology, Political Science, Media and Culture, Psychology and Computer Science, the contributors lay out key questions, practical challenges and common sense concerns underlying the incorporation of common sense within machine learning algorithms for simulating intelligence, socialising robots, self-driving vehicles, personnel selection, reading, automatic text analysis and text production. **Think Like a Human** David Weitzner, 2025-05-13 A new way of thinking that improves how we work, create and live, empowering readers to outsmart AI, a tool that can never do what humans do. The bedrock on which technology has been built and on which we now make strategic, political, ethical and even day-to-day decisions, algorithmic thinking is flawed. As we race headlong into a future where we outsource all our problem-solving to artificial intelligence, the greatest threat is not superintelligent machinery but too much trust in Big Tech and not enough trust in the power of our own minds. *Think Like a Human* offers a new way forward, what Dr. Weitzner calls artful intelligence, a philosophy that can help each of us solve problems and make better decisions. To think artfully is to approach problem-solving not just with our brains but with our hands, eyes and ears, along with our literal and metaphorical hearts and guts, tapping into the myriad of underutilized cognitive resources distributed throughout our bodies. *Think Like a Human* is a refreshing antidote and reality check to artificial intelligence mania and fear. Cutting through the hype, misinformation and corporate hustle around AI, this book will inspire you to adopt

the artful approach bringing intuition and emotional intelligence to your work and life      **Writing about Data** Joanna Wolfe, 2024-08-15 Writing about Data introduces writers to the notion that presenting data involves rhetorical choices and addresses the key strategies for working with data including best practices for creating charts and graphs      *ChatGPT als Feedbackassistentz* Lucius Valens, 2025-01-20 Studienarbeit aus dem Jahr 2024 im Fachbereich Soziologie Arbeit Ausbildung Organisation Note 1,7 Universität Münster Institut für Soziologie Veranstaltung Seminar KI aus soziologischer Perspektive Sprache Deutsch Abstract Die Arbeit untersucht die Potenziale und Grenzen des Einsatzes von ChatGPT als Feedbackassistentz im sozialwissenschaftlichen Unterricht Dabei werden die Funktionsweise von Large Language Models LLMs sowie die Bedeutung von lernwirksamem formativem Feedback theoretisch und praktisch beleuchtet Unter Berücksichtigung soziologischer und pädagogischer Perspektiven wird analysiert wie ChatGPT Lehrkräfte bei der Förderung von individueller Lernmotivation kognitiver Aktivierung und Chancengleichheit unterstützen kann Gleichzeitig werden Herausforderungen wie die Variabilität der Feedbackqualität und die Notwendigkeit einer gestärkten Feedback Literacy kritisch reflektiert Die Ergebnisse zeigen dass ChatGPT ein vielversprechendes Werkzeug zur Lehrkraftentlastung und Unterrichtsoptimierung darstellen kann jedoch eine bewusste Implementierung und weiterführende Forschung erfordert
