*Reimagining Intelligent Computer-Assisted Language Education* Stevkovska, Marija, Klemenčič, Marijana, Kavaklı Ulutaş, Nurdan, 2024-10-18 Reimagining language education through intelligent technologies and computer assistance marks a shift in how we approach language learning in the digital age. With advancements in artificial intelligence and machine learning, there is potential to transform traditional methods into personalized educational experiences. Intelligent systems now offer adaptive learning pathways that cater to individual proficiency levels, learning styles, and progress rates, making language education more accessible and effective. These technologies beg further exploration to effectively provide real-time feedback and support, creating a more engaging and responsive educational experience. *Reimagining Intelligent Computer-Assisted Language Education* explores fundamental aspects of educational technology to improve language teaching and learning. It reimagines educational practice for language teaching and learning through the integration of educational technology for making the language teaching and learning process more efficient and engaging while improving learner performance and progress. This book covers topics such as artificial intelligence, language education, and academic writing and is a useful resource for education professionals, language learners, computer engineers, academicians, scientists, and researchers.
