*Handbook of Research on Value Creation for Small and Micro Social Enterprises* Maher, Chi, 2018-12-07 In the corporate world businesses are focused on increasing their revenues but ignore the cries of social and environmental concerns from nearby communities At the other end of the spectrum nonprofits seek to help their local communities but are constantly required to create fundraisers without having adequate time to put those collected donations to use The world needs an industry to combine civic engagement and public service with wealth and value creation to provide self sustaining opportunities for public services that are sometimes overlooked or ignored The Handbook of Research on Value Creation for Small and Micro Social Enterprises defines the concept of social enterprise and provides vital insight into the importance of rebalancing creating and promoting economic activities that achieve social fairness cultural fulfillment and the protection of the environment While highlighting topics such as marketing strategies cross cultural frameworks and public policy this publication focuses on empowering rather than controlling sustainable solutions for various communities and consumers This book is ideally designed for researchers policymakers academicians who teach and or research small and micro social enterprises and advanced level students furthering their research exposure to pertinent topics in this field **Black Fox Station Units 1-2, Guaranteed Loan**, 1978 **More and Better Jobs in South Asia** The World Bank, 2011-12-20 South Asia has created nearly 800 000 jobs per month during the last decade Robust economic growth in large parts of the region has created better jobs those that pay higher wages for wage workers and reduce poverty for the self employed the largest segment of the region's employed Going forward South Asia faces the enormous challenge of absorbing 1 to 1.2 million entrants to the labor force every month for the next two decades at rising levels of productivity This calls for an agenda that cuts across sectors and includes improving the reliability of electricity supply for firms in both urban and rural settings dealing decisively with issues of governance and corruption making access to land easier for urban informal firms and strengthening transport links between rural firms and their markets It requires improving nutrition in early childhood to avoid cognitive impairment intensifying the focus on quality of learning in education systems equipping workers with the skills that employers demand and reorienting labor market regulations and programs to protect workers rather than jobs The continuance of high economic growth to help improve job quality is not assured But the region's demography can provide a favorable tailwind The growth of workers exceeds that of dependents in much of the region The resources saved from having fewer dependents can be shifted to high priority investments in physical and human capital accumulation necessary to create productive jobs in countries with an enabling policy framework But the demographic window of opportunity is open for only the next three decades a fact which lends urgency to the reform agenda This book will be of interest to policy makers their advisers researchers and students of economics who seek solutions not only to the challenge of creating more and better jobs in South Asia but globally as well It is the first title in South Asia Development Matters a new series that will serve as a
