Comet Carl Sagan, Ann Druyan, 1990-05-01 *The Comet Box* Adrian Stirling, 2011-05-25 It's 1986 and Halley's Comet is hurtling towards Earth Everyone is talking about what the comet will bring wishes could be granted people might go mad great disasters could happen When Andrew is asked to write down his greatest wish for the Comet Box he can think of only one thing that his runaway sister Amelia will finally come home As the comet draws nearer he begins to learn the reasons why she left in the first place and the more he learns the more he wants to forget When Amelia is captured and brought home she reveals a shocking secret that makes Andrew's once safe world begin to unravel As the comet arrives Andrew must choose whether to be blind to the mistakes of the people around him or to side with his sister as she tears his family apart

Soviet Life, 1986 Martian Metamorphoses Ev Cochrane, 1997 **DEEP IMPACTS** Sergio Correa, **When the Asteroid Hits** Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded
