Editorial and Opinion Steven M. Hallock, 2006-11-30. In 1930 there were 288 competitive major newspaper markets in the United States. Today there are fewer than 30. The diminishing diversity of opinion and voices in newspapers' editorials is taking place even as technological advances seemingly provide more sources of the same information. As Hallock shows, the concentration of media ownership in fewer and fewer hands allows those individuals and entities an inordinate amount of influence. In this intriguing book, he examines 18 newspaper markets to show us exactly how and where this troubling trend is occurring, what it means for the political landscape and ultimately how it can affect us all. Newspaper editorials say a lot about the society in which we live. They are not just an indication and reflection of the issues of the day and of which way the political wind is blowing. They are also a part of the political climate that sets the agenda for politicians and helps them discern which are the hot button issues and which side people are on. Journalists and politicians enjoy a level of symbiosis in their relationships; they influence each other indirectly. It therefore follows that when fewer ideas and a narrower range of opinions are expressed in the nation's newspapers, there is a real danger that our thinking can become more simplistic as well.

Evaluating Public Communication Jim Macnamara, 2017-09-05. Evaluating Public Communication addresses the widely reported lack of rigorous outcome and impact-oriented evaluation in advertising, public relations, corporate, government, political and organizational communication and specialist fields such as health communication. This transdisciplinary analysis integrates research literature from each of these fields of practice as well as interviews, content analysis and ethnography to identify the latest models and approaches. Chapters feature a review of 30 frameworks and models that inform processes for evaluation in communication, including the latest recommendations of industry bodies, evaluation councils and research institutes in several countries; recommendations for standards based on contemporary social science research and industry initiatives such as the IPR Task Force on Standards and the Coalition for Public Relations Research Standards; an assessment of metrics that can inform evaluation, including digital and social media metrics; 10 informal research methods and over 30 formal research methods for evaluating public communication; evaluation of public communication campaigns and projects in 12 contemporary case studies. Evaluating Public Communication provides clear guidance on theory and practice for students, researchers and professionals in PR, advertising and all fields of communication.

[The Nigerian Journal of Communications](#), 2001. *Building Communication Theory* Dominic A. Infante, Andrew S. Rancer, Deanna F. Womack, 2003. The authors have organized this book

to help students learn the process of theory building In clear engaging and comprehensible language they offer a solid foundation for understanding four perspectives on communication Rather than presenting theories in isolation they discuss major theories within the structure of a particular approach and provide examples of the contributions each theory has made to explaining and predicting behavior If a student develops criteria by which to judge a theory that critical framework can be applied to assess the strengths and weaknesses of any new theory Confidence in evaluating contributions helps students appreciate and participate in the process The connections between theorizing and practical applications stimulate interest and further exploration The text does not attempt to be encyclopedic rather it offers a synthesized coherent view of theory from the social scientific perspective emphasizing contributions from communication theorists Learning about theory should be an enjoyable experience Building Communication Theory creates a context for involving students in an exciting and valuable pursuit The SAGE Glossary of the Social and Behavioral Sciences Larry E.
