

**Solutions to FE Exam "Dynamics" Review Problems;
Problems are Online at McGraw-Hill Website**

Prepared by
Stephen F. Felszeghy
CSULA Emeritus Professor of Mechanical Engineering

Start the web page for the book: Beer and Johnston, *Vector Mechanics for Engineers, Statics and Dynamics*, Ninth Edition, 2010, at: http://highered.mcgraw-hill.com/sites/0073529400/information_center_view0/.

Look for the "Online Learning Center" box on the left. Click on the "Student Edition" link. Select a chapter from the pull-down menu. My solutions, which you will find below, are for the online problems that are associated with the following chapters and topics:

- Chpt. 11: Kinematics of Particles
- Chpt. 12: Kinetics of Particles: Newton's Second Law
- Chpt. 13: Kinetics of Particles: Energy and Momentum Methods
- Chpt. 14: Systems of Particles
- Chpt. 15: Kinematics of Rigid Bodies
- Chpt. 16: Plane Motion of Rigid Bodies: Forces and Accelerations
- Chpt. 17: Plane Motion of Rigid Bodies: Energy and Momentum Methods
- Chpt. 19: Mechanical Vibrations

Click on "FE Exam Review."

Solve the problem, and select the answer from the multiple choices at the bottom. Click on the right-arrow to continue to the next problem. This process ends when you click on the right-arrow for the third time. To try to solve other problems from the same chapter, you will need to exit by clicking on, say, >Chapter XX< at the top, and restart "FE Exam Review." Now you will be presented with all new, or a mixture of old and new, problems. After repeated trials, no new problems will appear.

As I mentioned in class, some of the online problem statements have errors in them, and some solutions and answers are wrong. For this reason, I have prepared a separate document that lists the errors and corrections. You can access this document at: http://www.calstatela.edu/faculty/sfelsze/FE_Exam_Review_rev2.pdf. Although I shared the errors and corrections with McGraw-Hill, the company has not made any corrections on its Website.

The online problems are not numbered, except for being associated with chapter numbers. For this reason, I downloaded the online problems in no particular order, and numbered them consecutively in a decimal format, XX.X, where XX refers to the chapter number, and X stands for the sequence number. All the online problems numbered this way are included in the above "FE_Exam_Review_rev2.pdf" document under the heading: "Part 1, FE Exam Review, Online Problems and Solutions."

My own solutions, which you will find below, follow the problem numbering scheme I established above. I include sketches in my solutions to allow you to identify the problems to which my solutions apply without necessarily having to refer to Part 1 of the above "FE_Exam_Review_rev2.pdf" document.

I wish you all the best on your computer-based FE exam!

New Trends in Intelligent Software Methodologies, Tools and Techniques Ali Selamat, Sigeru Omatu, 2017-09-15
Software is an essential enabler for science and the new economy. It creates new markets and directions for a more reliable, flexible, and robust society and empowers the exploration of our world in ever more depth, but it often falls short of our expectations. Current software methodologies, tools, and techniques are still neither robust nor reliable enough for the constantly evolving market, and many promising approaches have so far failed to deliver the solutions required. This book presents the keynote Engineering Cyber Physical Systems and 64 peer-reviewed papers from the 16th International Conference on New Trends in Intelligent Software Methodology Tools and Techniques SoMeT_17 held in Kitakyushu, Japan, in September 2017, which brought together researchers and practitioners to share original research results and practical development experience in software science and related new technologies. The aim of the SoMeT conferences is to capture the essence of the new state of the art in software science and its supporting technology and to identify the challenges such technology will have to master. The book explores new trends and theories which illuminate the direction of developments in this field and will be of interest to anyone whose work involves software science and its integration into tomorrow's global information society.
