Proceedings of International Conference on Wireless Communication Hari Vasudevan, Zoran Gajic, Amit A. Deshmukh, 2022-01-15 This book comprises selected papers presented at the International Conference on Wireless Communication ICWiCOM 2021 which is organized by the Department of Electronics and Telecommunication Engineering D J Sanghvi College of Engineering Mumbai India during October 8-9, 2021. The book focuses on specific topics of wireless communication like signal and image processing applicable to wireless domains, networking, microwave and antenna design and telemedicine systems. Covering three main areas: Antenna Design, Networking, Signal Processing, Embedded Systems, and Internet of Things (IoT), it is a valuable resource for postgraduate and doctoral students. *Millimeter Wave Communication Systems* Kao-Cheng Huang, Zhaocheng Wang, 2011-04-20 The aim of this book is to present the modern design and analysis principles of millimeter wave communication system for wireless devices and to give postgraduates and system professionals the design insights and challenges when integrating millimeter wave personal communication system. Millimeter wave communication systems are going to play key roles in modern gigabit wireless communication area as millimeter wave industrial standards from IEEE, European Computer Manufacturing Association (ECMA) and Wireless High Definition (WHD) Group are on their way to the market. The book will review up-to-date research results and utilize numerous design and analysis for the whole system covering from millimeter wave frontend to digital signal processing in order to address major topics in a high speed wireless system. This book emphasizes the importance and the requirements of high gain antennas, low power transceiver, adaptive equalizer, modulation, channel coding and adaptive multi-user detection for gigabit wireless communications. In addition, the book will include the updated research literature and patents in the topics of transceivers, antennas, MIMO, channel capacity, coding, equalizer, Modem and multi-user detection. Finally, the application of these antennas will be discussed in light of different forthcoming wireless standards at V-band and E-band. **Innovation in MIMO Technologies, Systems, and Antennas** Albert Sabban, 2025-05-14 This book presents innovation in MIMO communication, wireless networks and antennas. The book comprehensively reviews massive MIMO systems, key technologies, challenges and future directions. The book presents green RF technologies and systems for MIMO antenna systems. Moreover, the book presents innovation in massive MIMO cellular networks and antennas. The family of LML detectors and the family of LAS detectors for massive MIMO communications are presented in the book. Active shielding methods for space radiation protection are also presented in the book. This book evaluates massive MIMO performance with Rayleigh, Rician and Nakagami fading channels and compares half duplex and full duplex modes using the HMR protocol. MIMO antenna arrays and sparse polarimetric arrays for MIMO systems are discussed in the book. In MIMO antenna networks, multiple antennas are used to transmit and receive elements. The antenna's electromagnetic signals are combined at each port of the RF communication system to improve the communication system specifications and improve the system's electrical performance.

by enabling data to be processed in real time over many signal RF channels MIMO systems provide better signal strength even without a clear line of sight as they utilize the bounced and reflected RF transmissions MIMO systems provide better quality and quantity of video information sent over the network Multiple data links minimize the number of lost data packets which results in better video and audio quality The book may be a valuable resource for MIMO antenna designers academy researchers communication engineers and communication systems project managers involved in developing and manufacturing MIMO arrays and communication systems The information presented aims to inspire further innovation and application in this field
