Computer Science A Structured Programming Approach Using C:

Computer Science Behrouz A. Forouzan, Richard F. Gilberg, 1997 *Computer Science A Structured Programming Approach Using C* presents both computer science theory and its implementations in the C language with a depth first approach. It follows a clear organizational structure supplemented by easy to follow charts and tables. All programs and functions are developed in a consistent and readable style based on the authors' extensive academic and industry experience. The first half of the book builds a firm understanding of expressions introducing pointers only to the extent necessary to cover pass by reference and arrays. Beginning with Chapter 9, the text develops the concept of pointers ending with a simple introduction to linked lists. *Computer Science* Behrouz A. Forouzan, Richard F. Gilberg, 2004 Based on the tenet that good habits are formed early, the authors consistently emphasize the principles of structured programming and software engineering. Every complete programme uses a consistent style and as programmes are analyzed, styles and standards are further explained.
