Learning for Health Professions Educators Roger Edwards, Bobbie Ann Adair White, Ardi Findyartini, 2025-06-02 The health professions continue to evolve and change rapidly as more opportunities and challenges emerge. Hence health professions educators are required to be adaptive and nimble in their creation and adoption of teaching and learning innovations. These innovations have included teaching with technologies like virtual reality, gamification, online applications, and artificial intelligence. Innovations also include know-how such as emotional intelligence and ways of approaching the learning process through student-centered learning experiences grounded in the cognitive science of learning. Scholarship related to identification of the best uses of different innovations is difficult. The same innovations have proven to be engaging in some contexts and burdensome in others. Additionally, simulation-based education continues to incorporate innovations in how health professions educators are taught, with more focus on effectiveness of the simulation educator, including applications with distance simulation. Training and development for health professions and simulation educators is becoming more formalized, yet gaps on effectiveness of training and development efforts persist. Faculty effectiveness, especially as it relates to educational innovation adoption, is difficult to measure and demonstration of related competencies is in its infancy. The goal of this Research Topic is to bring together state-of-the-art examples of scholarship in health professions education related to the awareness and appropriate adoption of innovation, which is broadly defined as an idea, practice, technology, and know-how. Evidence about the current state of emerging innovations, effectiveness of innovations, and evidence about the competencies needed for teaching in our evolving environments are all areas of interest for this collection. All types of scholarship can support this focus, including analyses based on primary quantitative and qualitative data collection, secondary data analyses, literature reviews, and methodological infrastructure tool development. Additionally, scholarship investigating how these innovations have influenced health professions educators, including their training and development, is part of the goal of the collection. The scope of this collection covers any innovations that are applicable to professional development and implementation for health professions educators. More specifically, we invite scholarship related to how educators prepare themselves for meeting the needs of their students, given the changing roles and innovations available to both faculty and students across learning environments worldwide. Examples of topics of interest include: Analyses of innovation related to the evolving roles of health professions educators; Reviews of educational innovation adoption by health professions education faculty, especially related to artificial intelligence-linked applications; Exploring factors associated with professional development training and effective educational innovation adoption by faculty; Simulation-based educational innovation applications for faculty development; Faculty innovation in resource-constrained environments in low and middle-income countries; Methodological challenges associated with studying educational innovations by faculty in health professions education; and critical research needs associated with generating and evaluating educational innovations. Methodological considerations associated with health professions education faculty competencies. Theoretically focused analyses are

This book presents selected papers from the 6th International Conference on Advances in Education and Information Technology AEIT 2025 held in Fukuoka Japan from January 10-12, 2025. With a worldwide increase in the development of new technology such as artificial intelligence (AI) and extended reality to enhance learning in school and industry settings, there is a progressive need to study the implementation of new technology in education and training. Of global concern in this area include issues such as teaching approaches, classroom management, and the evaluation of learning effectiveness. This book examines these topics and serves as a useful resource for beginner educators, academics, entrepreneurs, and professionals who are working in the field of implementing new technology in education and training.

Engineering Ingenuity

NAGC, 2025-12-30 **Engineering Ingenuity: Instruction for High Ability Learners in K-8 Classrooms** offers a groundbreaking exploration of innovative strategies, interdisciplinary approaches, and cutting-edge technologies designed to empower gifted and talented students in STEM education. This updated edition dives deeper into the intersection of engineering, creativity, and advanced cognitive abilities, providing educators with actionable frameworks to inspire the next generation of problem solvers and innovators. Chapters explore interdisciplinary learning by integrating science, mathematics, reading, and engineering design to create dynamic, inquiry-based experiences that foster critical thinking and innovation. This new edition also highlights the transformative potential of artificial intelligence and machine learning in personalized learning, addresses equity and inclusion in STEM by providing strategies to overcome barriers faced by underrepresented Black and Hispanic students, and emphasizes the importance of guided play in developing early math and spatial skills. Additionally, it explores problem-based learning to deeply engage students with engineering concepts and enrichment opportunities that nurture their interests and talents. Packed with evidence-based strategies, practical examples, and visionary insights, this comprehensive resource equips educators, administrators, and parents with the tools they need to transform K-8 classrooms into hubs of creativity, collaboration, and innovation, ensuring high ability learners thrive in engineering and STEM fields.

Essentials of Marketing Analytics, 1e Joseph F. Hair (Jr.), Dana E. Harrison, Haya Ajjan, 2021 We developed this new book with enthusiasm and great optimism. Marketing analytics is an exciting field to study, and there are numerous emerging opportunities for students at the undergraduate level and particularly at the master's level. We live in a global, highly competitive, rapidly changing world that is increasingly influenced by digital data, expanded analytical capabilities, information technology, social media, artificial intelligence, and many other recent developments. We believe this book will become the premier source for new and essential knowledge in data analytics, particularly for situations related to marketing decision making that can benefit from marketing analytics, which is likely 80 percent of all challenges faced by organizations.
