Bodywork Thomas Claire,1995 Describes some 15 different massage therapies from around the world **Aquatic
Rehabilitation** Richard Gene Ruoti,1997 Aquatic Rehabilitation has been developed to adress the needs of professionals of
diverse backgrounds The editors have envisioned this text to be useful not only to students but also to physical therapists
physicians occupational therapists nurses athletic trainers exercise physiologists recreational therapists and others who use
auatics as part of the rehabilitation process Massage for Therapists Margaret Hollis,2009-07-27 Massage is a basic skill
within physiotherapy and one which requires a high standard of practical application It is a skill which is increasingly being
taken up by other health care and complementary therapy professionals This new third edition of Massage for Therapists is a
timely and thorough update which continues the tradition of Margaret Hollis hands on approach The book is designed to be a
step by step guide to the theory and practical application of classical massage Once mastered these techniques may form the
basis for a variety of modifications suitable for specific conditions Massage for Therapists is split into three sections an
introduction to massage and preparation for giving a massage the massage manipulations by area of the body and some key
modifications to the standard manipulations In order to further enhance the practitioner s skill and to give the reader a
grounding in some of the popular specialities updated chapters on aromatherapy and massage in sport sit alongside new
chapters which introduce myofascial release and shiatsu Massage for Therapists will be of interest to student and qualified
physiotherapists and sports therapists as well as occupational therapists chiropractors osteopaths nurses complementary
therapists and beauty therapists Practical applied text Thoroughly updated by subject experts Illustrated throughout with
photographs which support the explanations of the therapeutic application **Fundamentals of Complementary and
Integrative Medicine** Marc S. Micozzi,2006 This resource lays the groundwork for a solid understanding of complementary
and integrative therapy It provides insight into the historical context of alternative healing systems as well as the most up to
date scientific research and clinical applications for integrative medicine Focusing on therapies best supported by clinical
trials and evidence it describes key concepts of the most prevalent complementary and alternative therapies in use today

This edition features many new chapters and a new appendix with thorough updates and references throughout *Body Mechanics and Self-care Manual* Marian Wolfe Dixon, 2001 This book shows bodywork professionals who may be experiencing symptoms of fatigue stress or overuse how to heal themselves and prevent injuries from recurring It teaches healthy bodyworkers how to stay that way and to help clients who suffer from repetitive motion injuries Chapter topics include principles of physics moving and static objects weight and pressure eastern influences on body mechanics unpatterning repetitive motion and other common injuries taking care of yourself physiologically and psychologically and adaptations for special populations conditions For all licensed massage therapists neuropaths chiropractors and chiropractic assistants acupuncturists physical therapists and physical therapist assistants certified nursing assistants and expressive art therapists
