**E-Logistics** Yingli Wang, Stephen Pettit, 2016-03-03 E logistics serves as the nerve system for the whole supply chain and enables smooth information flow within and between organizations. This contributed book focuses on the strategic role of e logistics in today's dynamic global environment. In E Logistics, international experts from both academia and industry examine how competitiveness and productivity in transport logistics and supply chain management can be improved using e logistics systems and technologies. A variety of successful e logistics business approaches are discussed, covering a range of commercial sectors and transport modes. Separate chapters consider e logistics developments for air freight, rail freight, road freight, sea transport and port systems. Subsequent chapters address in depth support systems for B2C and B2B e commerce and e fulfilment, warehouse management, RFID, electronic marketplaces, global supply network visibility and service chain automation. Industry case studies are used to support the discussion. The book also investigates emerging technologies in e logistics and considers what the future might hold in this rapidly changing and developing field. **Restating Orientalism**

Wael B. Hallaq, 2018-07-03 Since Edward Said's foundational work, Orientalism has been singled out for critique as the quintessential example of Western intellectuals' collaboration with oppression. Controversies over the imbrications of knowledge and power and the complicity of Orientalism in the larger project of colonialism have been waged among generations of scholars. But has Orientalism come to stand in for all of the sins of European modernity at the cost of neglecting the complicity of the rest of the academic disciplines? In this landmark theoretical investigation, Wael B. Hallaq reevaluates and deepens the critique of Orientalism in order to deploy it for rethinking the foundations of the modern project. Refusing to isolate or scapegoat Orientalism, Restating Orientalism extends the critique to other fields from law, philosophy and scientific inquiry to core ideas of academic thought such as sovereignty and the self. Hallaq traces their involvement in colonialism, mass annihilation and systematic destruction of the natural world, interrogating and historicizing the set of causes that permitted modernity to wed knowledge to power. Restating Orientalism offers a bold rethinking of the theory of the author, the concept of sovereignty and the place of the secular Western self in the modern project, reopening the problem of power and knowledge to an ethical critique and ultimately theorizing an exit from modernity's predicaments. A remarkably ambitious attempt to overturn the foundations of a wide range of academic disciplines while also drawing on the best they have to offer, Restating Orientalism exposes the depth of academia's lethal complicity in modern forms of capitalism, colonialism and hegemonic power. **West African Worlds**

Reginald Cline-Cole, Elsbeth Robson, 2016-02-17 West African Worlds provides a critical assessment of social, economic and political change in Africa's most populous and arguably most externally focused region. With an emphasis on globalisation and modernisation, case studies and commentary are integrated throughout to highlight the concerns and issues of the region. Enriched by an impressive mix of West African voices, this text combines theory and application with policy and practice to address socio-economic change, the pursuit of livelihoods and

**Modern Principles of Economics** Tyler Cowen, Alex Tabarrok, 2009-10-09 From the authors See the Invisible Hand Understand Your World That s the tagline of Modern Principles and our teaching philosophy Nobel laureate Vernon Smith put it this way At the heart of economics is a scientific mystery a scientific mystery as deep fundamental and inspiring as that of the expanding universe or the forces that bind matter How is order produced from freedom of choice We want students to be inspired by this mystery and by how economists have begun to solve it Thus we show how markets interconnect and respond in surprising ways to changes in resources and preferences Consider for example how markets respond to a reduction in the supply of oil Of course the price of oil increases giving consumers an incentive to use less and suppliers an incentive to discover more But an increase in the price of oil also encourages Brazilian sugar cane farmers to devote more of their production to ethanol and less to sugar thereby driving up the price of sugar An increase in the price of sugar means a reduction in the quantity of candy demanded So one way the market responds to a reduction in the supply of oil is by encouraging consumers to eat less candy In analyses like this we teach students to see the invisible hand and in so doing to understand their world Similarly we offer a unique and simple proof of the amazing invisible hand theorem that without any central direction competitive markets allocate production across firms in a way that minimizes aggregate costs To understand their world students must understand when self interest promotes the social interest and when it does not Thus Modern Principles has in depth analyses of externalities public goods and ethical issues with market incomes and trade Moreover we always discuss economic theory in the context of real world problems such as the decline of the ocean fisheries climate change and the shortage of human organs for transplant
