Quality Management Systems for the Food Industry: A Guide to ISO 9001/2 A.

Bolton,1997-07-31 The ISO 9001 2 series of standards for Quality Management Systems is of increasing importance to the food and drink industry it functions as an outward and visible sign to customers that the industry has a defined quality management system that has been independently appraised and is regularly audited ISO 9001 2 certification can enable a company to reduce the audit burden from a multitude of customers and can also help the manufacturer or distributor involved in auditing its own suppliers Above all it may improve the effectiveness of its own operation and profits Quality Management Systems for the Food Industry describes what the standards are what they mean and how to achieve them and identifies both the potential benefits and limitations It discusses choice of assessment house whether to use consultants or not and particularly points out the detail that assessors will be looking for Guidance is given on the basic format for a suitable quality management system *Improving the HACCP System Through the Application of ISO 22000* Matthew J. Surdick,2012 The purpose of this study was to develop the framework and systems to advance the current HACCP food safety program to reflect the standard of ISO 22000 The goals of the study were to conduct an analysis of identified food safety systems to understand the best food safety practices conduct a GAP analysis of the food safety system at XYZ and finally to conduct a need assessment focusing on organizational analysis task analysis and individual analysis The methods used in the study include a review of literature of established food safety systems to determine necessary improvements and utilize an ISO 22000 audit checklist to determine the gap between the current food safety system at company XYZ and the ISO standard The last method used in the study was a semi structured interview guide to conduct an interview with different levels of management at company XYZ Information collected from the audit checklist and semi structured interview suggest that the current system established at company XYZ would benefit from the implementation of ISO 22000 principles The current system at Company XYZ fails to properly train employees and managers on HACCP principles and pre requisite programs indicated by the results in the audit checklist and semi structured interview Implementing a training program that teaches employees and managers the basics of the program and the reason for the program in addition to improving management involvement will positively affect Company XYZ s food safety system
