

# AP Chemistry Chemical Equations Worksheet

## Introduction

Help your AP Chemistry students review chemical equations with this worksheet.

## Concepts

- AP chemistry review
- Chemical reactions

## Discussion

The College Board has provided only a few examples of the types of questions that might be asked. (Visit the College Board Web site at [www.apcentral.collegeboard.com/apc/public/courses/150180.html?type=print](http://www.apcentral.collegeboard.com/apc/public/courses/150180.html?type=print) for examples.) AP Chemistry teachers have asked us if we have any products or worksheets to address this new format. The following list of practice chemical equations is provided as a helpful tool to assist teachers. We have compiled these questions based on our interpretation of the questions on the College Board Web site. Flinn Scientific has no additional information or guidance other than that provided by the College Board on its Web site.

Changes to the AP Chemistry Exam format for 2007 include modification to Question 4 in Section II. Previously, students were asked to write chemical equations for any five of eight given sets of chemical reactions. The new format requires students to write balanced chemical equations showing only the reacting substances (excluding spectator ions) for three different sets of reactants and to answer a short question (requiring no calculator) about each reaction. The questions are intended to test the students' understanding of the meaning of the reactions.

In each of the 38 reactions listed below, a representative question about the reaction and the answer to the question are included, along with the balanced chemical equation. We hope that you will find this worksheet helpful in preparing students for the new AP Chemistry chemical equation section.
