## Project Scope

### Situation / Problem / Opportunity

Current reporting functionality in ServiceNow is very limited, not user friendly and accessible only to ITIL users.

### Project Goals

The Enterprise Service Management Reporting project intends to plan, design, construct and implement a structured data warehouse environment that will include data from ServiceNow. The data warehouse will support various areas of data from ServiceNow. The automated collection of data from ServiceNow will be available to create a wide range of reports and dashboards depending on the customer need.

The vision of the project is to improve efficiency and service levels of ITS services and support.

### In Scope / Out of Scope

#### In Scope:

- Incident and Change related tables will be loaded into the data warehouse
- Predefined Incident Management reporting will be available
- Predefined Change Management reporting will be available
- Ad-hoc reporting for Incident and Change Management will be available

Zambruski,2008-07-28 Providing structured yet adaptable models of project success within an organization A Standard for

Enterprise Project Management explains each of the basic elements needed for project success and integrates them into a balanced life cycle continuum. It also supplies an inventory of practical policies, procedures, techniques, and templates for consistent management of projects. The book first discusses project authorization and initiation followed by analysis and planning. It then covers execution control and closure. Each phase contains an explanation and an illustration of how to optimize success. Throughout the text, the author refers to numerous appendices that constitute both blank and completed templates. He provides details on how to use these tools with an emphasis on balancing the benefits of standardization and the need for flexibility. The accompanying downloadable resources encompass a color version of the book with four bonus features: Quick start with Project 2003 that offers a one-page tutorial and three pages of screen prints designed to quickly generate readable and concise project plans; Complex project readiness grid that suggests how to manage intricate interrelationships in a project or program environment; Project management competency development grid that outlines a program for developing key skills among project managers within an organization; Traceability matrix that illustrates how various levels of requirements and final solutions are interrelated. This book offers a painless guide to quickly getting business initiatives out of the clouds and onto the ground. Blending the rigor and discipline of project management with the thoroughness of business analysis, it shows how to successfully build, complement, and enhance project management and business analysis in any organization.
